# Introduction

Healthy or sick, young or old, the one thing all your patients have in common is the need for a highly nutritious diet. Purina has formulated a wide range of nutritional options ranging from therapeutic diets for pets with complex health issues to well-pet formulas to meet the nutritional needs of dogs and cats in each life stage.

Purina has several supplements developed by experts that meet our strict quality and safety standards. This includes probiotic supplements that represent Purina's leadership in the field of microbiome research.

This guide contains technical information on each product from Purina® Pro Plan® Veterinary Diets and Supplements and helps identify the appropriate diet or supplement for each patient. The well-pet brands in this guide represent the high-quality choices available to your clients.

For more information about Purina Pro Plan Veterinary Diets and Supplements or any of the Purina Pro Plan well-pet diets, contact your Purina Veterinary Sales Consultant, your Veterinary Distributor, or call 1-800-222-VETS (8387), Monday - Thursday 8:00 am - 6:00 pm CST; Friday 8:00 am - 4:30 pm CST.

# Canine Diets

THE FOLLOWING SUGGESTED DIETS MAY BE APPROPRIATE FOR DOGS WITH CERTAIN FORMS OF THESE HEALTH CONDITIONS.

CONDITION	SUGGESTED DIETS	CONDITION	SUGGESTED DIETS
Atopic Dermatitis	<b>DRM</b> Dermatologic Management® Naturals With Added Vitamins and Minerals	Hepatic Disease (not associated with encephalopathy)	<b>EN</b> Gastroenteric®

## Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Mitral valve disease and other cardiomyopathies
- Cardiovascular disease
- Conditions benefitting from moderate sodium restriction

## Medical Contraindications:

- Hyperlipidemia (canned)

## General Health:

- High protein content to help maintain ideal body condition and lean body mass
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Great taste to help ensure adequate nutrient intake

## Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Purina Pro Plan Veterinary Diets CC CardioCare Canine Formulas provide complete and balanced nutrition for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE <sup>1</sup>			
BODY WEIGHT		DRY	CANNED
lbs	kg	Approximate Number Of 8-oz Cups/Day <sup>3</sup>	Approximate Number Of 13.4-oz Cans/Day <sup>3</sup>
5	2.3	5/8	3/4
10	4.5	7/8	1
20	9.1	1 3/8	1 5/8

40	18.2	2 1/4	2 1/2
50	22.7	2 5/8	3
60	27.3	3	3 3/8
80	36.4	3 5/8	4 1/8
100 <sup>4</sup>	45.5	4 1/8	4 3/4
CALORIE CONTENT (CALCULATED) <sup>2</sup>			
		3672 kcal/kg	1016 kcal/kg
		1666 kcal/lb	461 kcal/lb
		429 kcal/8-oz cup	385 kcal/13.4-oz can

## Cardiac Health:

First therapeutic diet to target metabolomic changes in dogs with myxomatous mitral valve disease

Breakthrough multiomics approach to the development of a cardiac protection blend to help nutritionally manage dogs with myxomatous mitral valve disease

Contains a Cardiac Protection Blend composed of amino acids and fatty acids (omega-3 and medium-chain triglycerides), magnesium and vitamin E; this blend has been shown to:

- a) Increase serum omega-3 and decrease omega-6 fatty acid concentrations to help nutritionally manage dogs with cardiac conditions
  - b) Increase serum arginine and citrulline, precursors of nitric oxide, to promote vasodilation
  - c) Improve energy use as signified by biomarkers of fatty acid oxidation
- Helps stabilize cardiac parameters as measured by echocardiography in dogs with early stage mitral valve disease
  - Supports cardiac function in dogs with early stage mitral valve disease

## Ingredients (Dry):

Oat meal, corn protein meal, rice, chicken meal, animal fat preserved with mixed-tocopherols, vegetable oil (source of medium-chain triglycerides), cassava root flour, dried beet pulp, potato protein, powdered cellulose, liver flavor, fish meal, fish oil, mono and dicalcium phosphate, natural flavor, calcium carbonate, L-Lysine monohydrochloride, DL-Methionine, potassium chloride, magnesium sulfate, potassium sorbate (a preservative), L-Arginine, salt, Vitamin E supplement, taurine, L-Cysteine, glycine, choline chloride, zinc sulfate, ferrous sulfate, L-ascorbyl-2-polyphosphate (Vitamin C), niacin (Vitamin B-3), manganese sulfate, Vitamin A supplement, soybean oil, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, copper sulfate, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), garlic oil, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), calcium iodate, biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. B264023

## Ingredients (Canned):

Water, meat by-products, chicken, rice, powdered cellulose, dextrose, vegetable oil (source of medium-chain triglycerides), fish oil, dried egg product, L-Lysine monohydrochloride, glycine, DL-Methionine, carrageenan, magnesium sulfate, locust bean gum, potassium chloride, garlic powder, tricalcium phosphate, taurine, Vitamin E supplement, xanthan gum, zinc sulfate, L-Carnitine, ferrous sulfate, niacin (Vitamin B-3), thiamine mononitrate (Vitamin B-1), calcium pantothenate (Vitamin B-5), copper sulfate, manganese sulfate, pyridoxine hydrochloride (Vitamin B-6), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), Vitamin A supplement, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), potassium iodide, sodium selenite. A259621

Carbohydrate, %	32.5	21.5

†Based on digestion testing conducted at the Purina PetCare Technology Centers

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

**CN****CRITICAL  
NUTRITION®**

## Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Critical illness
- Conditions that require assisted feeding
- Convalescence
- Anorexia
- Malnutrition

## Medical Contraindications:

- Renal failure
- Hyperlipidemia

CN Critical Nutrition can be diluted and will pass through most feeding tubes 14 French or larger. 1 can CN + 25 mL water recommended for most tube feeding results in 1.14 kcal/mL.

## Feeding and Administration:

Pro Plan Veterinary Diets CN Critical Nutrition Canine & Feline Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments based on the patient's condition and nutritional status. CN Critical Nutrition may be fed free-choice or by syringe or tube feeding.

			1.35 kcal/mL <sup>5</sup>		

## Critical Care:

Highly digestible to promote optimal nutrient absorption

Energy-dense to provide needed calories

Provides essential amino acids for protein synthesis and tissue repair

High fat to provide energy density

- Smooth consistency to allow for syringe or tube feeding
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress

## Ingredients:

Water, meat by-products, beef, liver, poultry giblets, corn oil, rice flour, salmon, artificial and natural flavors, pork fat (preserved with TBHQ and citric acid), tricalcium phosphate, potassium chloride, guar gum, oat hulls, calcium sulfate, magnesium sulfate, DL-Methionine, taurine, Vitamin E supplement, choline chloride, zinc sulfate, thiamine mononitrate (Vitamin B-1), ferrous sulfate, niacin (Vitamin B-3), copper sulfate, calcium pantothenate (Vitamin B-5), Vitamin A supplement, manganese sulfate, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement, sodium selenite. \*Most struvite uroliths in dogs are caused by urinary tract infections. In the case of non-sterile struvite uroliths, it is important to treat with the appropriate antibiotic in addition to dietary management.

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

WITH ADDED VITAMINS, MINERALS & NUTRIENTS

## Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Atopic dermatitis
- Pruritus
- Flea allergy dermatitis
- Other inflammatory skin conditions
- Conditions benefitting from moderate sodium restriction

## Medical Contraindications:

- None

## Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets DRM Dermatologic Management Naturals Canine Formula provides complete and balanced nutrition for growth of puppies and maintenance of adult dogs, including growth of large sized dogs (70 lb. or more as an adult).

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

## Skin Health:

Formulated for the nutritional management of dogs with dermatitis

Contains omega-3 fatty acids to help nutritionally manage dogs with inflammation associated with pruritus

Contains omega-6 fatty acids, vitamin A and zinc to maintain and protect the skin barrier

## Natural Nutrition:

Natural with added vitamins, minerals and nutrients. Formulated without corn, wheat, or artificial colors and flavors

## General Health:

- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Great taste to help ensure adequate nutrient intake
- Ox/St Defense: This diet promotes a urinary environment unfavorable to the development of both struvite\* and calcium oxalate crystals.

## Ingredients:

Brewers rice, trout, oat meal, pea protein, beef fat preserved with mixed-tocopherols, natural flavor, potato protein, pea fiber, fish oil, mono and dicalcium phosphate, glycerin, calcium carbonate, potassium chloride, salt, L-Lysine monohydrochloride, taurine, Vitamin E supplement, choline chloride, zinc sulfate, L-ascorbyl-2-polyphosphate (Vitamin C), ferrous sulfate, zinc sulfate, manganese sulfate, niacin (Vitamin B-3), Vitamin A supplement, calcium carbonate, beta-Carotene, calcium pantothenate (Vitamin B-5), copper sulfate, thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), calcium iodate, menadione sodium bisulfite complex (Vitamin K), Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. C263421

\*Most struvite uroliths in dogs are caused by urinary tract infections. In the case of non-sterile struvite uroliths, it is important to treat with the appropriate antibiotic in addition to dietary management.

<sup>1</sup> Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

<sup>2</sup> Kilocalories of metabolizable energy (ME)

<sup>3</sup> This daily amount should be divided into several small meals throughout the day.

<sup>4</sup> For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

**EL****ELEMENTAL**

## Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

### ELIMINATION DIET TRIAL

- Adverse food reaction
  - Food allergic dermatitis
  - Food allergic gastroenteritis
  - Food intolerance
- Inflammatory bowel disease
- Idiopathic chronic enteropathy
- Protein-losing enteropathy
- Short bowel syndrome

## Medical Contraindications:

- None

## Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets EL Elemental Canine Formula provides complete and balanced nutrition for growth of puppies and maintenance of adult dogs, including growth of large sized dogs (70 lb. or more as an adult).

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

## Gastrointestinal Health and Food Sensitivities:

Formulated with purified amino acids to support dermatological and gastrointestinal health in dogs with adverse food reactions

Low-allergen carbohydrate sources to help minimize the risk of an allergic reaction

Highly digestible to promote optimal nutrient absorption

- Limited fat to aid digestion for dogs with compromised gastrointestinal tracts
- Contains medium-chain triglycerides (10.70 - 17.27% of fat), a source of fat which is easily digested and absorbed to provide readily available energy
- Post-manufacturing testing conducted to ensure trace levels of intact proteins do not exceed 0.1%

## General Health:

- Contains omega-3 fatty acids, a source of EPA and DHA, omega-6 fatty acids, vitamin A and zinc to maintain and protect the skin barrier
- Contains prebiotic fiber to help nourish the GI tract
- Great taste to help ensure adequate nutrient intake

## Ingredients:

Corn starch, tapioca starch, dicalcium phosphate, glycine, partially hydrogenated canola oil preserved with TBHQ, L-Glutamic acid, coconut oil, L-Alanine, L-Aspartic acid, L-Lysine monohydrochloride, powdered cellulose, L-Leucine, L-Arginine, L-Valine, sodium bicarbonate, L-Threonine, L-Proline, L-Serine, DL-Methionine, potassium chloride, L-Isoleucine, corn oil, L-Histidine, L-Phenylalanine, salt, L-Tyrosine, soy lecithin, fish oil, inulin, choline bitartrate, L-Tryptophan, taurine, zinc sulfate, magnesium oxide, Vitamin E supplement, ferrous sulfate, manganese sulfate, niacin (Vitamin B-3), soybean oil, Vitamin A supplement, copper sulfate, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), garlic oil, calcium iodate, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. ## Gastrointestinal Health:

Highly digestible to promote optimal nutrient absorption

Contains medium-chain triglycerides (6.1 - 17.3% of fat), a source of fat which is easily digested and absorbed to provide readily available energy

Colostrum helps stabilize intestinal microflora, reducing the risk of stress-related diarrhea, and primes local and systemic immune systems (dry)

Contains a select prebiotic fiber to support GI microbiome balance and digestive health

## General Health:

- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake
- Ox/St Defense: This diet promotes a urinary environment unfavorable to the development of both struvite\* and calcium oxalate crystals. (dry)

## Ingredients (Dry):

Brewers rice, whole grain corn, corn protein meal, chicken meal, animal fat preserved with mixed-tocopherols, mono and dicalcium phosphate, natural flavor, coconut oil, glycerin, wheat bran, potassium chloride, calcium carbonate, sodium bicarbonate, salt, soybean oil, fish oil, L-Lysine monohydrochloride, L-Threonine, Vitamin E supplement, zinc proteinate, choline chloride, dried colostrum, L-ascorbyl-2-polyphosphate (Vitamin C), ferrous sulfate, manganese proteinate, L-Tryptophan, niacin (Vitamin B-3), thiamine mononitrate (Vitamin B-1), calcium pantothenate (Vitamin B-5), Vitamin A supplement, copper proteinate, riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), garlic oil, menadione sodium bisulfite complex (Vitamin K), biotin (Vitamin B-7), calcium iodate, Vitamin D-3 supplement, sodium selenite. ## Gastrointestinal Health:

Highly digestible to promote optimal nutrient absorption

Contains medium-chain triglycerides (7.5 – 12.1% of fat), a source of fat which is easily digested and absorbed to provide readily available energy

Colostrum helps stabilize intestinal microflora, reducing the risk of stress-related diarrhea, and primes local and systemic immune systems (dry)

Contains a select prebiotic fiber to support GI microbiome balance and digestive health (dry)

## Natural Nutrition:

Natural with added vitamins, minerals and nutrients. Formulated without corn, wheat, or artificial colors and flavors

## General Health:

- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake
- Ox/St Defense: This diet promotes a urinary environment unfavorable to the development of both struvite\* and calcium oxalate crystals. (dry)

## Ingredients (Dry):

Brewers rice, chicken meal, brewers dried yeast, cassava root flour; animal fat preserved with mixed-tocopherols, potato protein, natural flavor, coconut oil, pea protein, glycerin, mono and dicalcium phosphate, potassium chloride, soybean oil, salt, L-Lysine monohydrochloride, dried colostrum, fish oil, calcium carbonate, pumpkin, Vitamin E supplement, zinc proteinate, taurine, choline chloride, DL-Methionine, L-ascorbyl-2-polyphosphate (Vitamin C), ferrous sulfate, manganese proteinate, niacin (Vitamin B-3), Vitamin A supplement, thiamine mononitrate (Vitamin B-1), calcium pantothenate (Vitamin B-5), copper proteinate, riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), menadione sodium bisulfite complex (Vitamin K), folic acid (Vitamin B-9), calcium iodate, biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. E262523

## Ingredients (Canned):

Chicken, water, liver, barley, rice, sweet potatoes, potato protein, coconut oil, oatmeal, glycerin, tricalcium phosphate, guar gum, potassium chloride, salt, natural smoke flavor, fish oil, Vitamin E supplement, L-Lysine monohydrochloride, magnesium sulfate, zinc sulfate, thiamine mononitrate (Vitamin B-1), ferrous sulfate, niacin (Vitamin B-3), copper sulfate, manganese sulfate, calcium pantothenate (Vitamin B-5), pyridoxine hydrochloride (Vitamin B-6), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), Vitamin A supplement, potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. \* Most struvite uroliths in dogs are caused by urinary tract infections. In the case of non-sterile struvite uroliths, it is important to treat with the appropriate antibiotic in addition to dietary management.

<sup>1</sup> Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

<sup>2</sup> Kilocalories of metabolizable energy (ME)

<sup>3</sup> This daily amount should be divided into several small meals throughout the day.

<sup>4</sup> For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

# EN GASTROENTERIC®

## FIBER BALANCE

### Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Fiber responsive colitis
- Large bowel diarrhea
- Constipation
- Diabetes mellitus

### Medical Contraindications:

- None

### Feeding and Administration:

Pro Plan Veterinary Diets EN Gastroenteric Fiber Balance Canine Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE <sup>1</sup>

## Gastrointestinal Health:

Optimal level of fiber to help promote intestinal motility

Blend of soluble and insoluble fiber to help support GI health

Contains a select prebiotic fiber to support GI microbiome balance and digestive health

## Glucose Management:

- Complex carbohydrates help regulate blood glucose levels and minimize postprandial area under the curve

## General Health:

- Moderate calorie and fat content
- Appropriate protein content to help maintain lean body mass and ideal body condition
- Great taste to help ensure adequate nutrient intake
- Ox/St Defense: This diet promotes a urinary environment unfavorable to the development of both struvite\* and calcium oxalate crystals.

## Ingredients:

Whole grain corn, dried beet pulp, poultry by-product meal, corn protein meal, barley, animal fat preserved with mixed-tocopherols, pea fiber, glycerin, natural flavor, mono and dicalcium phosphate, wheat bran, dried whey, potassium chloride, salt, fish oil, L-Lysine monohydrochloride, calcium carbonate, choline chloride, Vitamin E supplement, zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), manganese sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, copper sulfate, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), calcium iodate, biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. ## LOW FAT

### Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Hyperlipidemia
- Lymphangiectasia
- Pancreatitis
- Protein-losing enteropathy
- Chronic Enteropathy/Inflammatory Bowel Disease
- Exocrine pancreatic insufficiency
- Vomiting and diarrhea

### Medical Contraindications:

- None

### Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets EN Gastroenteric Low Fat Dry Canine Formula provides complete and balanced nutrition for maintenance of adult dogs. Purina Pro Plan Veterinary Diets EN Gastroenteric Low Fat Canned Canine Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

## Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

### GASTROINTESTINAL

- Elimination diet trial
- Food allergic gastroenteritis
- Food intolerance
- Chronic Enteropathy/  
Inflammatory Bowel Disease
- Lymphangiectasia
- Protein-losing enteropathy
- Pancreatitis
- Exocrine pancreatic  
insufficiency
- Malabsorption

### DERMATOLOGIC

- Elimination diet trial
- Food allergic dermatitis

### ADDITIONAL

- Hepatic encephalopathy
- History of urate  
urolithiasis
- Hyperlipidemia

## Medical Contraindications:

- None

## Feeding and Administration:

Pro Plan Veterinary Diets HA Hydrolyzed Canine Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

## Gastrointestinal Health and Food Sensitivities:

Formula contains a single hydrolyzed protein source to reduce the risk of allergic reaction

Single low-allergen carbohydrate source (corn starch) to help minimize the risk of an allergic reaction

Highly digestible to promote optimal nutrient absorption

- Contains medium-chain triglycerides (16.5-27.0% of fat), a source of fat which is easily digested and absorbed to provide readily available energy
- Contains omega-6 fatty acids, vitamin A and zinc to maintain and protect the skin barrier
- Promotes a healthy skin and coat

## General Health:

- Contains antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

## Ingredients (Vegetarian):

Corn starch, hydrolyzed soy protein isolate, coconut oil, partially hydrogenated canola oil preserved with TBHQ, powdered cellulose, tricalcium phosphate, dicalcium phosphate, corn oil, potassium chloride, guar gum, choline chloride, calcium carbonate, salt, magnesium oxide, DL-Methionine, taurine, zinc sulfate, Vitamin E supplement, ferrous sulfate, manganese sulfate, soybean oil, niacin (Vitamin B-3), copper sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, garlic oil, pyridoxine hydrochloride (Vitamin B-6), calcium iodate, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), menadione sodium bisulfite complex (Vitamin K), sodium selenite. ## Gastrointestinal Health and Food Sensitivities:

Formulas contain hydrolyzed protein sources to reduce the risk of allergic reaction

Single low-allergen carbohydrate source (corn starch or pea starch) to help minimize the risk of an allergic reaction

Highly digestible to promote optimal nutrient absorption (dry)

- Contains medium-chain triglycerides (12.5-21.0% of fat), a source of fat which is easily digested and absorbed to provide readily available energy
- Contains omega-6 fatty acids, vitamin A and zinc to maintain and protect the skin barrier
- Promotes a healthy skin and coat

## General Health:

- Contains antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

## Ingredients (Dry):

Corn starch, hydrolyzed soy protein isolate, partially hydrogenated canola oil preserved with TBHQ, coconut oil, powdered cellulose, tricalcium phosphate, corn oil, dicalcium phosphate, hydrolyzed chicken liver, hydrolyzed chicken giblets, potassium chloride, guar gum, choline chloride, calcium carbonate, salt, magnesium oxide, DL-Methionine, taurine, zinc sulfate, Vitamin E supplement, ferrous sulfate, manganese sulfate, soybean oil, niacin (Vitamin B-3), copper sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, garlic oil, pyridoxine hydrochloride (Vitamin B-6), calcium iodate, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), menadione sodium bisulfite complex (Vitamin K), sodium selenite. C262721

## Ingredients (Canned):

Water, pea starch, hydrolyzed chicken liver, hydrolyzed soy protein isolate, powdered cellulose, dicalcium phosphate, coconut oil, guar gum, potassium chloride, carrageenan, soybean oil, fish oil, choline chloride, magnesium sulfate, salt, taurine, L-Threonine, DL-Methionine, xanthan gum, Vitamin E supplement, L-Cysteine, zinc sulfate, glycine, ferrous sulfate, niacin (Vitamin B-3), Vitamin A supplement, calcium carbonate, copper sulfate, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), manganese sulfate, Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), potassium iodide, menadione sodium bisulfite complex (Vitamin K), Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. C458920

†Based on digestion testing conducted at the Purina PetCare Technology Centers

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

# HA

# HYDROLYZED®

SALMON FLAVOR

## Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

### GASTROINTESTINAL

- Elimination diet trial
- Food allergic gastroenteritis
- Food intolerance
- Chronic Enteropathy/  
Inflammatory Bowel Disease
- Lymphangiectasia
- Protein-losing enteropathy
- Pancreatitis
- Exocrine pancreatic  
insufficiency
- Malabsorption

### DERMATOLOGIC

- Elimination diet trial
- Food allergic dermatitis

### ADDITIONAL

- Hyperlipidemia

## Medical Contraindications:

- None

## Feeding and Administration:

Pro Plan Veterinary Diets HA Hydrolyzed Salmon Flavor Canine Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for growth of puppies and maintenance of adult dogs, including growth of large sized dogs (70 lb. or more as an adult).

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

**JM****JOINT MOBILITY®**

## Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Adult and senior dogs with osteoarthritis
- Healthy puppies and adult dogs predisposed to joint disorders
- Rheumatoid arthritis
- Other inflammatory joint conditions
- Heart disease

## Medical Contraindications:

- None

## Feeding and Administration:

Pro Plan Veterinary Diets JM Joint Mobility Canine Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for growth of puppies and maintenance of adult dogs, including growth of large sized dogs (70 lb. or more as an adult).

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

		3571 kcal/kg
		1620 kcal/lb
		379 kcal/8-oz cup

## Joint Mobility:

High level of omega-3 fatty acids (EPA) to help nutritionally manage dogs with joint conditions

Improves mobility in arthritic dogs

Contains glucosamine to help support cartilage health

- Reduces enzymes involved in cartilage breakdown
- Reduces inflammation associated with joint conditions

## General Health:

- High protein-to-calorie ratio to help support lean muscle mass
- May be fed for weight loss and weight maintenance
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Formulated with a moderate sodium restriction, high protein and high omega-3 fatty acid level for the nutritional support of dogs with heart disease
- Great taste to help ensure adequate nutrient intake
- Ox/St Defense: This diet promotes a urinary environment unfavorable to the development of both struvite\* and calcium oxalate crystals.

## Ingredients:

Brewers rice, trout, salmon meal, corn protein meal, poultry by-product meal, dried egg product, oat fiber, natural flavor, animal fat preserved with mixed-tocopherols, fish oil, chicken, mono and dicalcium phosphate, potassium chloride, Vitamin E supplement, calcium carbonate, salt, choline chloride, glucosamine hydrochloride, zinc sulfate, taurine, L-ascorbyl-2-polyphosphate (Vitamin C), ferrous sulfate, manganese sulfate, copper sulfate, niacin (Vitamin B-3), Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride, calcium iodate, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. ## Neurologic Health:

Formulated with medium-chain triglyceride vegetable oil to help nutritionally manage dogs with epilepsy as an adjunct to veterinary therapy

## Cognitive Health:

Enhanced with a unique blend of nutrients and medium-chain triglyceride vegetable oil to help nutritionally manage dogs with Cognitive Dysfunction Syndrome

## General Health:

- Added antioxidant vitamins E & C to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Omega-3 fatty acids to help support brain health and EPA to help reduce inflammation
- High in protein to help maintain lean muscle mass
- Great taste to help ensure adequate nutrient intake
- Ox/St Defense: This diet promotes a urinary environment unfavorable to the development of both struvite\* and calcium oxalate crystals.

## Ingredients:

Chicken, chicken meal, corn protein meal, brewers rice, ground yellow corn, ground wheat, vegetable oil (source of medium-chain triglycerides), corn germ meal, barley, glycerin, fish oil, natural flavor, dried egg product, L-Arginine, wheat bran, mono and dicalcium phosphate, fish meal, salt, potassium chloride, calcium carbonate, L-Lysine monohydrochloride, Vitamin E supplement, choline chloride, L-ascorbyl-2-polyphosphate (Vitamin C), zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), manganese sulfate, Vitamin A supplement, thiamine mononitrate (Vitamin B-1), soybean oil, calcium pantothenate (Vitamin B-5), Vitamin B-12 supplement, copper sulfate, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), garlic oil, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), calcium iodate, biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. **NF****KIDNEY FUNCTION®**

## Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Chronic kidney disease
- Hepatic disease associated with encephalopathy
- Conditions benefitting from moderate sodium reduction

## Medical Contraindications:

- Conditions that require high protein or phosphorus intake
- Hyperlipidemia (canned)

## Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets NF Kidney Function Canine Formula provides complete and balanced nutrition for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

## Renal Health:

Restricted amount of high-quality protein to minimize the production of filtered nitrogenous waste products

Restricted phosphorus to nutritionally manage dogs with chronic kidney disease

Reduced sodium to minimize the risk of hypertension

- Added B-complex vitamins to help compensate for those lost secondary to polyuria
- Formulated to be non-acidifying
- Energy-dense for needed calories

## General Health:

- Contains antioxidant vitamins A and E to help support a healthy immune system
- Great taste to help ensure adequate nutrient intake
- Ox/St Defense: This diet promotes a urinary environment unfavorable to the development of both struvite\* and calcium oxalate crystals. (dry)

## Ingredients (Dry):

Whole grain corn, rice, dried egg product, animal fat preserved with mixed tocopherols, sugar, glycerin, liver flavor, natural flavor, dried whey, sodium caseinate, calcium carbonate, vegetable oil, L-Lysine monohydrochloride, potassium chloride, fish oil, potassium citrate, salt, Vitamin E supplement, choline chloride, zinc sulfate, L-Tryptophan, ferrous sulfate, mono and dicalcium phosphate, niacin (Vitamin B-3), manganese sulfate, Vitamin A supplement, thiamine mononitrate (Vitamin B-1), calcium pantothenate (Vitamin B-5), riboflavin supplement (Vitamin B-2), copper sulfate, Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), garlic oil, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), calcium iodate, biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. E262925

## Ingredients (Canned):

Water sufficient for processing, meat by-products, rice, corn grits, beef, liver, chicken by-products, animal fat (preserved with TBHQ and citric acid), calcium sulfate, guar gum, fish oil, potassium citrate, locust bean gum, carrageenan, potassium chloride, magnesium sulfate, choline chloride, natural smoke flavor, Vitamin E supplement, DL-Methionine, zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), thiamine mononitrate (Vitamin B-1), calcium pantothenate (Vitamin B-5), copper sulfate, pyridoxine hydrochloride (Vitamin B-6), manganese sulfate, Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), Vitamin A supplement, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), potassium iodide, sodium selenite. \* Most struvite uroliths in dogs are caused by urinary tract infections. In the case of non-sterile struvite uroliths, it is important to treat with the appropriate antibiotic in addition to dietary management.

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

## Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Obesity (weight loss and weight maintenance)
- Constipation
- Fiber responsive colitis
- Diabetes mellitus in overweight dogs
- Hyperlipidemia in overweight dogs

## Medical Contraindications:

- Conditions associated with catabolic states

## Feeding and Administration:

Pro Plan Veterinary Diets OM Overweight Management Canine Formulas are formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight loss or maintenance.

## Healthy Weight Loss:

Low in fat and calories

High protein-to-calorie ratio promotes loss of body fat while helping maintain lean body mass

Natural fiber contributes to satiety

- Added L-carnitine to help dogs burn fat more effectively
- Isoflavones help reduce the risk of weight regain and fat accumulation (dry)
- Available in dry, including Select Blend, and wet to help with long-term compliance and weight-loss success
- May be fed for weight loss or weight maintenance

## General Health:

- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake
- Ox/St Defense: This diet promotes a urinary environment unfavorable to the development of both struvite\* and calcium oxalate crystals. (dry)

## Ingredients (Dry):

Whole grain corn, corn protein meal, soybean hulls, soybean germ meal, soybean meal, pea fiber, wheat gluten, poultry by-product meal, glycerin, natural flavor, powdered cellulose, animal fat preserved with mixed-tocopherols, tricalcium phosphate, salt, calcium carbonate, choline chloride, Vitamin E supplement, zinc sulfate, ferrous sulfate, L-Lysine monohydrochloride, L-Carnitine, manganese sulfate, niacin (Vitamin B-3), Vitamin A supplement, soybean oil, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), copper sulfate, Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), garlic oil, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), calcium iodate, Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. F263023

## Ingredients (Canned):

Water, chicken, liver, powdered cellulose, rice, soy protein isolate, meat by-products, carrageenan, guar gum, tricalcium phosphate, potassium chloride, calcium sulfate, locust bean gum, magnesium sulfate, Vitamin E supplement, calcium carbonate, zinc sulfate, L-Carnitine, thiamine mononitrate (Vitamin B-1), ferrous sulfate, niacin (Vitamin B-3), copper sulfate, calcium pantothenate (Vitamin B-5), manganese sulfate, pyridoxine hydrochloride (Vitamin B-6), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), Vitamin A supplement, potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), sodium selenite. ## Healthy Weight Loss:

3:1 protein-to-starch ratio

Shown to reduce body fat and minimize loss of lean body mass in a 6-month weight loss study\*

- Natural fiber contributes to satiety
- Isoflavones help reduce risk of weight regain and fat accumulation
- Added L-carnitine to help dogs burn fat more effectively

## Metabolic Activity:

Helps improve select metabolic health indicators

- Shown to reduce postprandial interstitial glucose
- Shown to reduce serum cholesterol\*\*
- Shown to reduce and stabilize serum triglyceride concentration\*\*
- Shown to significantly decrease fasting serum leptin\*\*
- Shown to significantly decrease fasting insulin levels after 6 months of weight loss\*
- Shown to reduce select pro-inflammatory cytokines after 6 months of weight loss\*

## Ingredients (Dry):

Wheat gluten, soy protein concentrate, poultry by-product meal, soybean germ meal, fish meal, pea protein, corn starch, dried beet pulp, powdered cellulose, natural flavor, fish oil, animal fat preserved with mixed-tocopherols, sodium caseinate, dried egg product, gelatin, potassium chloride, soy protein isolate, calcium carbonate, inulin, tricalcium phosphate, salt, Vitamin E supplement, taurine, choline chloride, L-Carnitine, glucosamine hydrochloride, zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), manganese sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), copper sulfate, Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), calcium iodate, biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. B264123

## Joint Mobility:

High level of omega-3 fatty acids (EPA) to help nutritionally manage dogs with joint conditions

- Contains glucosamine to help support cartilage health

## General Health:

- Vitamins A & E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Great taste to help ensure adequate nutrient intake
- Ox/St Defense: This diet promotes a urinary environment unfavorable to the development of both struvite<sup>‡</sup> and calcium oxalate crystals.

\* Caloric restriction @25% MER for months 1-4 and @40% MER for months 5-6; on package feeding instructions reflect 40% restriction.

\*\* After 2 months of weight loss

## Urinary Management:

Promotes a urinary environment unfavorable to the development of both sterile struvite uroliths\* (undersaturated, RSS<1) and calcium oxalate uroliths (metastable, RSS<12)

Helps dissolve sterile struvite uroliths\*

Helps reduce the risk of both sterile struvite\* and calcium oxalate urolith recurrence

- UR Ox/St canned diet contains >74% moisture to contribute to total water intake

## General Health:

- Appropriate protein content to help maintain ideal body condition and lean body mass
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Great taste to help ensure adequate nutrient intake
- Ox/St Defense: This diet promotes a urinary environment unfavorable to the development of both struvite\* and calcium oxalate crystals.

## Ingredients (Dry):

Whole grain corn, rice, chicken by-product meal, corn protein meal, animal fat preserved with mixed-tocopherols, powdered cellulose, egg and chicken flavor, glycerin, natural flavor, salt, calcium carbonate, phosphoric acid, potassium chloride, magnesium sulfate, L-Lysine monohydrochloride, zinc proteinate, Vitamin E supplement, choline chloride, potassium citrate, ferrous sulfate, manganese proteinate, niacin (Vitamin B-3), Vitamin A supplement, copper proteinate, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), calcium iodate, menadione sodium bisulfite complex (Vitamin K), biotin (Vitamin B-7), Vitamin D-3 supplement, sodium selenite. D263223

## Ingredients (Canned):

Chicken, water, meat by-products, liver, rice, powdered cellulose, guar gum, carrageenan, potassium chloride, magnesium sulfate, natural smoke flavor, potassium citrate, caramel color, calcium sulfate, Vitamin E supplement, thiamine mononitrate (Vitamin B-1), zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), calcium pantothenate (Vitamin B-5), copper sulfate, manganese sulfate, pyridoxine hydrochloride (Vitamin B-6), Vitamin B-12 supplement, riboflavin supplement (Vitamin B-2), Vitamin A supplement, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), potassium iodide, sodium selenite. B259422

†Based on digestion testing conducted at the Purina PetCare Technology Centers

\* Most struvite uroliths in dogs are caused by urinary tract infections. In the case of non-sterile struvite uroliths, it is important to treat with the appropriate antibiotic in addition to dietary management.

1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.

## Medical Indications:

Diets with these nutritional modifications have been recommended for dogs with the following conditions:

- Dissolution of sterile struvite uroliths\*
- Reducing the risk of calcium oxalate urolith recurrence
- Reducing the risk of sterile struvite urolith recurrence\*

## Medical Contraindications:

- Hyperlipidemia

## Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that UR Savory Selects Urinary Ox/St With Chicken in Gravy and UR Savory Selects Urinary Ox/St With Salmon in Gravy provide complete and balanced nutrition for maintenance of adult dogs.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE <sup>1</sup>			
BODY WEIGHT		CHICKEN	SALMON
lbs	kg	Approximate Number Of 8-oz Cups/Day <sup>3</sup>	Approximate Number Of 13.3-oz Cans/Day <sup>3</sup>
5	2.3	3/4	3/4
10	4.5	1	1

## Urinary Management:

Promotes a urinary environment unfavorable to the development of both sterile struvite uroliths\* (undersaturated, RSS<1) and calcium oxalate uroliths (metastable, RSS<12)

Helps dissolve sterile struvite uroliths\*

Helps reduce the risk of both sterile struvite\* and calcium oxalate urolith recurrence

- UR Ox/St canned diet contains >74% moisture to contribute to total water intake

## General Health:

- Appropriate protein content to help maintain ideal body condition and lean body mass
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Great taste to help ensure adequate nutrient intake

## Ingredients (Chicken):

Water, chicken, meat by-products, wheat gluten, liver, rice, soy flour, powdered cellulose, guar gum, locust bean gum, tricalcium phosphate, potassium chloride, choline chloride, magnesium sulfate, potassium citrate, calcium carbonate, calcium sulfate, Vitamin E supplement, zinc sulfate, niacin (Vitamin B-3), ferrous sulfate, thiamine mononitrate (Vitamin B-1), calcium pantothenate (Vitamin B-5), pyridoxine hydrochloride (Vitamin B-6), copper sulfate, riboflavin supplement (Vitamin B-2), manganese sulfate, Vitamin B-12 supplement, biotin (Vitamin B-7), folic acid (Vitamin B-9), Vitamin A supplement, Vitamin D-3 supplement, potassium iodide, sodium selenite. A258824

## Ingredients (Salmon):

Water, chicken, meat by-products, wheat gluten, liver, rice, soy flour, salmon, powdered cellulose, guar gum, locust bean gum, potassium chloride, tricalcium phosphate, magnesium sulfate, choline chloride, potassium citrate, calcium carbonate, calcium sulfate, Vitamin E supplement, zinc sulfate, niacin (Vitamin B-3), ferrous sulfate, thiamine mononitrate (Vitamin B-1), calcium pantothenate (Vitamin B-5), pyridoxine hydrochloride (Vitamin B-6), copper sulfate, riboflavin supplement (Vitamin B-2), manganese sulfate, Vitamin B-12 supplement, biotin (Vitamin B-7), folic acid (Vitamin B-9), Vitamin A supplement, Vitamin D-3 supplement, potassium iodide, sodium selenite. **CN****CRITICAL  
NUTRITION®**

## Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Critical illness
- Conditions that require assisted feeding
- Convalescence
- Anorexia
- Malnutrition

## Medical Contraindications:

- Renal failure

CN Critical Nutrition can be diluted and will pass through most feeding tubes 14 French or larger. 1 can CN + 25 mL water recommended for most tube feeding results in 1.14 kcal/mL.

## Feeding and Administration:

Pro Plan Veterinary Diets CN Critical Nutrition Canine & Feline Formula is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments based on the patient's condition and nutritional status. CN Critical Nutrition may be fed free-choice or by syringe or tube feeding.

### FEEDING GUIDE<sup>1</sup>

BODY WEIGHT		Daily Feeding Amounts For Hospitalized Cats (RER)		Daily Feeding Amounts For Maintenance (MER)	
lbs	kg	kcal/day	Approximate Number Of 5.5-oz Cans/Day <sup>3</sup>	kcal/day	Approximate Number Of 5.5-oz Cans/Day <sup>3</sup>
3	1.4	90	3/8	78	3/8

			1325 kcal/kg		
			601 kcal/lb		
			206 kcal/5.5-oz can		
			1.35 kcal/mL <sup>5</sup>		

## Critical Care:

Highly digestible to promote optimal nutrient absorption

Energy-dense to provide needed calories

Provides essential amino acids for protein synthesis and tissue repair

High fat to provide energy density

- Smooth consistency to allow for syringe or tube feeding
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress

## Ingredients:

Water, meat by-products, beef, liver, poultry giblets, corn oil, rice flour, salmon, artificial and natural flavors, pork fat (preserved with TBHQ and citric acid), tricalcium phosphate, potassium chloride, guar gum, oat hulls, calcium sulfate, magnesium sulfate, DL-Methionine, taurine, Vitamin E supplement, choline chloride, zinc sulfate, thiamine mononitrate (Vitamin B-1), ferrous sulfate, niacin (Vitamin B-3), copper sulfate, calcium pantothenate (Vitamin B-5), Vitamin A supplement, manganese sulfate, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement, sodium selenite. 1 Adjustments must be made for environmental conditions, activity level, and body condition. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional pound of body weight, feed an additional 24 kilocalories.

5 CN Critical Nutrition can be diluted and will pass through most feeding tubes 1/4 French or larger. 1 can CN + 25 mL water recommended for most tube feeding.

**DH****DENTAL HEALTH®**

### Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Adult cats to help reduce the accumulation of plaque and tartar
- Adult and senior cats for everyday maintenance

### Medical Contraindications:

- None

### Feeding and Administration:

Pro Plan Veterinary Diets DH Dental Health Feline Formula is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE <sup>1</sup>		
BODY WEIGHT		DRY
lbs	kg	Approximate Number Of 8-oz Cups/Day <sup>3</sup>
5	2.3	1/2

## Dental Health:

Optimal kibble size and unique, crunchy kibble texture provides mechanical action to reduce the accumulation of plaque and tartar

- VOHC Seal of Acceptance: Helps control plaque and tartar

[www.VOHC.org](http://www.VOHC.org)

## General Health:

- Appropriate protein content to help maintain ideal body condition
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Great taste to help ensure adequate nutrient intake

## Ingredients:

Ground yellow corn, poultry by-product meal, corn protein meal, liver flavor, animal fat preserved with mixed-tocopherols, powdered cellulose, fish meal, glycerin, potassium chloride, natural flavor, tetra sodium pyrophosphate, salt, brewers dried yeast, calcium carbonate, choline chloride, glycine, Vitamin E supplement, taurine, zinc sulfate, thiamine mononitrate (Vitamin B-1), niacin (Vitamin B-3), ferrous sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), manganese sulfate, tricalcium phosphate, riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), copper sulfate, folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), Menadione Sodium Bisulfite Complex (Vitamin K), calcium iodate, sodium selenite. 4 For each additional pound of body weight, feed an additional 24 kilocalories.

## Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Diabetes mellitus
- Persistent hyperglycemia
- Enteritis, diarrhea
- Hepatic lipidosis
- Critical care management

## Medical Contraindications:

- Renal failure
- Hepatic encephalopathy

## Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets DM Dietetic Management Dry Feline Formula provides complete and balanced nutrition for maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE <sup>1</sup>		
BODY WEIGHT		DRY
lbs	kg	Approximate Number Of 8-oz Cups/Day <sup>3</sup>
5	2.3	1/4
8	3.6	3/8
12	5.4	1/2
16	7.2	3/4
20	9.1	7/8

CALORIE CONTENT (CALCULATED) <sup>2</sup>		
		3792 kcal/kg
		1720 kcal/lb
		544 kcal/8-oz cup

## Glucose Management:

High protein and low carbohydrate to help support the unique nutritional needs of diabetic cats

May help promote insulin sensitivity and reduce external insulin requirements

May help reduce postprandial hyperglycemia

## General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals.
- High protein content to help maintain lean body mass and ideal body condition
- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

## Ingredients (Dry):

Poultry by-product meal, soy protein isolate, corn protein meal, soy flour, animal fat preserved with mixed-tocopherols, corn starch, liver flavor, calcium carbonate, phosphoric acid, gelatin, fish oil, potassium chloride, choline chloride, DL-Methionine, taurine, powdered cellulose, salt, Vitamin E supplement, L-Lysine monohydrochloride, zinc sulfate, niacin (Vitamin B-3), ferrous sulfate, manganese sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, copper sulfate, pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), menadione sodium bisulfite complex (Vitamin K), calcium iodate, sodium selenite. †Based on digestion testing conducted at the Purina PetCare Technology Centers

1 Adjustments must be made for environmental conditions, activity level, and body condition. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional pound of body weight, feed an additional 24 kilocalories.

## Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Diabetes mellitus
- Persistent hyperglycemia
- Enteritis, diarrhea
- Hepatic lipidosis
- Critical care management

## Medical Contraindications:

- Renal failure
- Hepatic encephalopathy

## Feeding and Administration:

Pro Plan Veterinary Diets DM Dietetic Management Canned Feline Formula is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats. Pro Plan Veterinary Diets DM Savory Selects Dietetic Management Feline Formula is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

## Glucose Management:

High protein and low carbohydrate to help support the unique nutritional needs of diabetic cats

May help promote insulin sensitivity and reduce external insulin requirements

May help reduce postprandial hyperglycemia

## General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals.
- High protein content to help maintain lean body mass and ideal body condition
- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

## Ingredients (DM):

Meat by-products, water, chicken, salmon, soy protein isolate, oat hulls, L-Lysine monohydrochloride, artificial and natural flavors, guar gum, potassium chloride, calcium sulfate, sodium bisulfate, taurine, Vitamin E supplement, carrageenan, choline chloride, salt, thiamine mononitrate, L-Carnitine, zinc sulfate, ferrous sulfate, niacin, calcium pantothenate, Vitamin A supplement, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride, manganese sulfate, copper sulfate, riboflavin supplement, Vitamin B-12 supplement, biotin, folic acid, Vitamin D-3 supplement, potassium iodide. C253020

## Ingredients (DM Savory Selects):

Water, chicken, liver, wheat gluten, meat by-products, corn starch-modified, soy flour, glycine, potassium chloride, tricalcium phosphate, natural flavor, L-Lysine monohydrochloride, taurine, salt, choline chloride, caramel color, Vitamin E supplement, zinc sulfate, ferrous sulfate, thiamine mononitrate, L-Carnitine, niacin, manganese sulfate, copper sulfate, calcium pantothenate, Vitamin A supplement, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride, riboflavin supplement, Vitamin B-12 supplement, biotin, folic acid, potassium iodide, Vitamin D-3 supplement. C253120

		3805 kcal/kg	1023 kcal/kg
		1726 kcal/lb	464 kcal/lb
		546 kcal/8-oz cup	159 kcal/5.5-oz can

## Gastrointestinal Health:

Highly digestible to promote optimal nutrient absorption

Energy-dense for feeding reduced meal volume

Colostrum helps stabilize intestinal microflora, reducing the risk of stress-related diarrhea, and primes local and systemic immune systems (dry)

Contains a select prebiotic fiber to support GI microbiome balance and digestive health (wet)

- High protein for the unique requirements of cats with GI conditions

## General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals.
- Added B-complex vitamins
- Moderate fat provides energy
- Contains omega-3 fatty acids from fish oil
- Great taste to help ensure adequate nutrient intake

## Ingredients (Dry):

Soy protein isolate, poultry by-product meal, corn protein meal, soy flakes, animal fat preserved with mixed-tocopherols, corn starch, natural flavor, calcium carbonate, phosphoric acid, fish oil, potassium chloride, choline chloride, DL-Methionine, powdered cellulose, taurine, zinc proteinate, salt, dried colostrum, Vitamin E supplement, manganese proteinate, thiamine mononitrate (Vitamin B-1), ferrous sulfate, niacin (Vitamin B-3), Vitamin A supplement, calcium pantothenate (Vitamin B-5), copper proteinate, riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), calcium iodate, menadione sodium bisulfite complex (Vitamin K), sodium selenite. D256220

## Ingredients (Canned):

Water, meat by-products, turkey, soy protein isolate, rice, oat hulls, L-Lysine monohydrochloride, calcium gluconate, artificial and natural flavors, fish oil, inulin, guar gum, tricalcium phosphate, potassium chloride, magnesium proteinate, sodium bisulfate, taurine, Vitamin E supplement, carrageenan, choline chloride, salt, zinc sulfate, ferrous sulfate, L-Carnitine, thiamine mononitrate (Vitamin B-1), manganese sulfate, copper sulfate, niacin (Vitamin B-3), calcium pantothenate (Vitamin B-5), Vitamin A supplement, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, potassium iodide, biotin (Vitamin B-7), folic acid (Vitamin B-9), Vitamin D-3 supplement. 1 Adjustments must be made for environmental conditions, activity level, and body condition. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME)

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional pound of body weight, feed an additional 24 kilocalories.

# EN GASTROENTERIC<sup>®</sup>

## NATURALS

WITH ADDED VITAMINS, MINERALS & NUTRIENTS

### Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Vomiting and diarrhea
- Gastritis and enteritis
- Pancreatitis
- Chronic Enteropathy/Inflammatory Bowel Disease
- Hepatic lipidosis

### Medical Contraindications:

- Renal failure
- Hepatic encephalopathy

### Feeding and Administration:

Pro Plan Veterinary Diets EN Gastroenteric Naturals Feline Formulas are formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for growth of kittens and maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE <sup>1</sup>			
BODY WEIGHT		DRY	CANNED
lbs	kg	Approximate Number Of 8-oz Cups/Day <sup>3</sup>	Approximate Number Of 5.5-oz Cans/Day <sup>3</sup>
5	2.3	1/4	3/4
8	3.6	3/8	1 1/4
12	5.4	5/8	2
16	7.2	3/4	2 1/2
20	9.1	1	3 1/4
25 <sup>4</sup>	11.4	1 1/4	4
CALORIE CONTENT (CALCULATED) <sup>2</sup>			
		3817 kcal/kg	1014 kcal/kg
		1731 kcal/lb	460 kcal/lb
		520 kcal/8-oz cup	158 kcal/5.5-oz can

## Gastrointestinal Health:

Highly digestible to promote optimal nutrient absorption

Colostrum helps stabilize intestinal microflora, reducing the risk of stress-related diarrhea, and primes local and systemic immune systems (dry)

Energy-dense for feeding reduced meal volume

Contains a select prebiotic fiber to support GI microbiome balance and digestive health

## Natural Nutrition:

Natural with added vitamins, minerals, and nutrients. Formulated without corn, wheat, or artificial colors and flavors

## General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals.
- Moderate fat provides energy (dry)
- Added B-complex vitamins
- Contains omega-3 fatty acids from fish oil
- Great taste to help ensure adequate nutrient intake

## Ingredients (Dry):

Chicken meal, soy protein isolate, brewers rice, dried egg product, animal fat preserved with mixed-tocopherols, potato protein, brewers dried yeast, pea protein, natural flavor, cassava root flour, sodium caseinate, dried whey, potassium chloride, calcium carbonate, fish oil, phosphoric acid, sodium bisulfate, powdered cellulose, taurine, pumpkin, zinc proteinate, choline chloride, salt, dried colostrum, Vitamin E supplement, DL-Methionine, manganese proteinate, thiamine mononitrate (Vitamin B-1), ferrous sulfate, niacin (Vitamin B-3), Vitamin A supplement, calcium pantothenate (Vitamin B-5), copper proteinate, riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid, Vitamin D-3 supplement, biotin (Vitamin B-7), calcium iodate, menadione sodium bisulfite complex (Vitamin K), sodium selenite. C256321

## Ingredients (Canned):

Meat by-products, ocean whitefish, water, chicken, long grain rice, sweet potatoes, oat hulls, inulin, guar gum, fish oil, sodium bisulfate, potassium chloride, taurine, Vitamin E supplement, magnesium proteinate, carrageenan, calcium sulfate, salt, L-Carnitine, thiamine mononitrate (Vitamin B-1), zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), manganese sulfate, copper sulfate, calcium pantothenate (Vitamin B-5), Vitamin A supplement, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement. C253321

**HA****HYDROLYZED®**

## Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

### GASTROINTESTINAL

- Elimination diet trial
- Food allergic gastroenteritis
- Food intolerance
- Chronic Enteropathy/Inflammatory Bowel Disease
- Pancreatitis
- Hyperlipidemia

### DERMATOLOGIC

- Elimination diet trial
- Food allergic dermatitis

## Medical Contraindications:

- None

## Feeding and Administration:

Purina Pro Plan Veterinary Diets HA Hydrolyzed Feline Formula is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for growth of kittens and maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

FEEDING GUIDE <sup>1</sup>		
BODY WEIGHT		DRY
lbs	kg	Approximate Number Of 8-oz Cups/Day <sup>3</sup>

CALORIE CONTENT (CALCULATED) <sup>2</sup>		
		3428 kcal/kg
		1555 kcal/lb
		291 kcal/8-oz cup

## Gastrointestinal Health and Food Sensitivities:

Formula contains hydrolyzed protein sources to reduce the risk of allergic reaction

Single low-allergen carbohydrate source (rice starch) to help minimize the risk of an allergic reaction

Highly digestible formula to promote optimal nutrient absorption

- Contains omega-6 fatty acids, vitamin A and zinc to maintain and protect the skin barrier

## General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals.
- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

## Ingredients:

Rice starch, hydrolyzed soy protein isolate, partially hydrogenated canola oil preserved with TBHQ, hydrolyzed chicken liver, calcium sulfate, powdered cellulose, hydrolyzed chicken, corn oil, tricalcium phosphate, fish oil, L-Lysine monohydrochloride, sodium bisulfate, potassium chloride, choline chloride, phosphoric acid, DL-Methionine, salt, guar gum, taurine, Vitamin E supplement, magnesium oxide, zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), manganese sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), copper sulfate, riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), Vitamin D-3 supplement, calcium iodate, biotin (Vitamin B-7), menadione sodium bisulfite complex (Vitamin K), sodium selenite. **NF****KIDNEY FUNCTION®****EARLY CARE**

## Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Chronic kidney disease – IRIS stages I and II\*

## Medical Contraindications:

- Growth and reproduction

\* Cats in any IRIS stage of chronic kidney disease may benefit from this diet. It is important to assess and reassess your patient.

## Feeding and Administration:

Pro Plan Veterinary Diets NF Kidney Function Early Care is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

### FEEDING GUIDE<sup>1</sup>

BODY WEIGHT		DRY	CANNED
lbs	kg	Approximate Number Of 8-oz Cups/Day <sup>3</sup>	Approximate Number Of 5.5-oz Cans/Day <sup>3</sup>
5	2.3	1/4	3/4
8	3.6	1/2	1 1/4

16	7.2	7/8	2 1/2
20	9.1	1 1/8	3 1/4
25 <sup>4</sup>	11.4	1 3/8	4
CALORIE CONTENT (CALCULATED) <sup>2</sup>			
		3668 kcal/kg	1010 kcal/kg
		1664 kcal/lb	458 kcal/lb
		448 kcal/8-oz cup	157 kcal/5.5-oz can

## Renal Health:

Moderate amount of high-quality protein to support the unique nutritional requirements of cats with early-stage chronic kidney disease

Controlled phosphorus to help nutritionally manage cats with chronic kidney disease

Contains EPA, an omega-3 fatty acid, to help reduce inflammatory mediators

- Controlled sodium
- Added B-complex vitamins and potassium to help compensate for loss secondary to polyuria
- Formulated to be non-acidifying
- Energy-dense for needed calories

## General Health:

- Highly digestible to promote optimal nutrient absorption
- Because calcium oxalate crystals are more prevalent in older cats<sup>5</sup>, this diet promotes a urinary environment unfavorable to the development of calcium oxalate crystals.
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress
- Contains a prebiotic fiber that helps nourish a healthy GI tract (wet)

## Ingredients (Dry):

Corn protein meal, tuna, barley, whole grain corn, soybean meal, animal fat preserved with mixed tocopherols, potato protein, liver flavor, powdered cellulose, fish oil, potassium chloride, calcium carbonate, L-Lysine monohydrochloride, tricalcium phosphate, potassium citrate, natural flavor, salt, choline chloride, glycine, Vitamin E supplement, DL-Methionine, taurine, zinc sulfate, ferrous sulfate, thiamine mononitrate (Vitamin B-1), niacin (Vitamin B-3), manganese sulfate, calcium pantothenate (Vitamin B-5), riboflavin supplement (Vitamin B-2), Vitamin A supplement, pyridoxine hydrochloride (Vitamin B-6), copper sulfate, Vitamin B-12 supplement, folic acid (Vitamin B-9), biotin (Vitamin B-7), Vitamin D-3 supplement, calcium iodate, menadione sodium bisulfite complex (Vitamin K), sodium selenite. C256825

## Ingredients (Canned):

Water, meat by-products, liver, rice, powdered cellulose, salmon, chicken fat preserved with ascorbic acid and citric acid, potato protein, L-Lysine monohydrochloride, glycine, potassium citrate, calcium gluconate, inulin, natural flavor, fish oil, guar gum, tricalcium phosphate, salt, potassium chloride, carrageenan, Vitamin E supplement, taurine, choline chloride, magnesium proteinate, thiamine mononitrate (Vitamin B-1), zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), calcium pantothenate (Vitamin B-5), manganese sulfate, copper sulfate, pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), Vitamin A supplement, folic acid (Vitamin B-9), menadione sodium bisulfite complex (Vitamin K), potassium iodide, Vitamin D-3 supplement. **OM****OVERWEIGHT  
MANAGEMENT®**

### Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Obesity (weight loss and weight maintenance)
- Fiber responsive gastrointestinal conditions
- Constipation
- Diabetes mellitus in overweight cats
- Hyperlipidemia in overweight cats
- Hairballs

### Medical Contraindications:

- Conditions associated with catabolic states

### Feeding and Administration:

Pro Plan Veterinary Diets OM Overweight Management Feline Formula and Pro Plan Veterinary Diets OM Overweight Management Feline Formula With Ocean Whitefish and Chicken In Sauce are formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight loss or maintenance.

## Healthy Weight Loss:

Low in fat and calories

High protein-to-calorie ratio promotes loss of body fat while helping maintain lean body mass

Natural fiber contributes to satiety

- Added L-carnitine to help cats burn fat more effectively
- Available in dry and canned (loaf and Savory Selects) to help with long-term compliance and weight loss success
- May be fed for weight loss or weight maintenance

## General Health:

- St/Ox Defense: This diet promotes a urinary environment unfavorable to the development of both struvite and calcium oxalate crystals.
- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

## Ingredients (Dry):

Corn protein meal, wheat gluten, soybean meal, poultry by-product meal, oat hulls, soy protein isolate, brewers rice, animal fat preserved with mixed-tocopherols, fish meal, powdered cellulose, animal liver flavor, phosphoric acid, calcium carbonate, L-Lysine monohydrochloride, potassium chloride, choline chloride, salt, Vitamin E supplement, taurine, zinc sulfate, ferrous sulfate, L-Carnitine, niacin (Vitamin B-3), L-ascorbyl-2-polyphosphate (Vitamin C), thiamine mononitrate (Vitamin B-1), manganese sulfate, Vitamin A supplement, calcium pantothenate (Vitamin B-5), riboflavin supplement (Vitamin B-2), copper sulfate, Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), Vitamin D-3 supplement, biotin (Vitamin B-7), calcium iodate, menadione sodium bisulfite complex (Vitamin K), sodium selenite. E256623

## Ingredients (Canned):

Water, meat by-products, liver, ocean whitefish, chicken, rice, powdered cellulose, potato protein, soy protein isolate, artificial and natural flavors, calcium sulfate, guar gum, potassium chloride, magnesium protein, choline chloride, salt, Vitamin E supplement, carrageenan, taurine, thiamine mononitrate (Vitamin B-1), zinc sulfate, ferrous sulfate, L-Carnitine, niacin (Vitamin B-3), manganese sulfate, copper sulfate, calcium pantothenate (Vitamin B-5), Vitamin A supplement, menadione sodium bisulfite complex (Vitamin K), pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), potassium iodide, folic acid (Vitamin B-9), Vitamin D-3 supplement. # UR

## URINARY® St/Ox®

### Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Dissolution of struvite uroliths
- Reducing the risk of calcium oxalate and struvite uroliths
- Struvite associated LUTS
- Idiopathic cystitis

### Medical Contraindications:

- Renal failure
- Cardiovascular disease
- Concurrent use of urine acidifiers

### Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets UR Urinary St/Ox Dry Feline Formula provides complete and balanced nutrition for maintenance of adult cats. Pro Plan Veterinary Diets UR Urinary St/Ox Canned Feline Formula is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats.

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight loss or maintenance.

#### FEEDING GUIDE<sup>1</sup>

		1428 kcal/lb			506 kcal/lb	
		287 kcal/8-oz cup			173 kcal/5.5-oz can	

## Urinary Management:

Promotes a urinary environment unfavorable to the development of both struvite uroliths (undersaturated, RSS<1) and calcium oxalate uroliths (metastable RSS<12)

Helps dissolve struvite uroliths

Helps reduce the risk of both struvite and calcium oxalate urolith recurrence

- Average urine pH range of 6.0-6.4
- Promotes increased urine volume to dilute the urine (dry)
- UR St/Ox canned loaf and Savory Selects diets contain >75% moisture to contribute to total water intake

## General Health:

- Moderate fat content (dry)
- High protein content to help maintain ideal body condition and lean body mass
- Available in dry and canned (loaf and Savory Selects) to help with long-term compliance
- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

## Ingredients (Dry):

<sup>†</sup>Based on digestion testing conducted at the Purina PetCare Technology Centers

<sup>1</sup> Adjustments must be made for environmental conditions, activity level, and body condition. Provide fresh water in a clean container daily.

<sup>2</sup> Kilocalories of metabolizable energy (ME)

<sup>3</sup> This daily amount should be divided into several small meals throughout the day.

<sup>4</sup> For each additional pound of body weight, feed an additional 24 kilocalories.

## Medical Indications:

Diets with these nutritional modifications have been recommended for cats with the following conditions:

- Dissolution of struvite uroliths
- Reducing the risk of calcium oxalate and struvite uroliths
- Struvite associated LUTS
- Idiopathic cystitis

## Medical Contraindications:

- Renal failure
- Cardiovascular disease
- Concurrent use of urine acidifiers

## Feeding and Administration:

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets UR Savory Selects Urinary St/Ox Salmon Recipe In Sauce Feline Formula provides complete and balanced nutrition for maintenance of adult cats. Purina Pro Plan Veterinary Diets UR Savory Selects Urinary St/Ox Turkey & Giblets Recipe In Sauce Feline Formula is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for maintenance of adult cats.

FEEDING GUIDE <sup>1</sup>			
BODY WEIGHT		TURKEY & GIBLETS RECIPE	SALMON RECIPE
lbs	kg	Approximate Number Of 5.5-oz Cans/Day <sup>3</sup>	Approximate Number Of 5.5-oz Cans/Day <sup>3</sup>
5	2.3	1	1
8	3.6	1 1/2	1 1/2
12	5.4	2 1/4	2 1/2
16	7.2	3	3
20	9.1	3 3/4	3 3/4
25 <sup>4</sup>	11.4	4 3/4	4 3/4
CALORIE CONTENT (CALCULATED) <sup>2</sup>			
		870 kcal/kg	861 kcal/kg
		395 kcal/lb	391 kcal/lb
		135 kcal/5.5-oz can	134 kcal/5.5-oz can

## Urinary Management:

Promotes a urinary environment unfavorable to the development of both struvite uroliths (undersaturated, RSS<1) and calcium oxalate uroliths (metastable RSS<12)

Helps dissolve struvite uroliths

Helps reduce the risk of both struvite and calcium oxalate urolith recurrence

- Average urine pH range of 6.0-6.4
- UR St/Ox canned loaf and Savory Selects diets contain >75% moisture to contribute to total water intake

## General Health:

- Moderate fat content
- High protein content to help maintain ideal body condition and lean body mass
- Available in dry and canned (loaf and Savory Selects) to help with long-term compliance
- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake
- Low calorie

## Ingredients (Salmon Recipe):

Salmon broth, salmon, liver, wheat gluten, chicken, corn starch-modified, artificial and natural flavors, soy flour, sodium bisulfate, potassium chloride, tricalcium phosphate, salt, fish oil, choline chloride, taurine, Vitamin E supplement, thiamine mononitrate, zinc sulfate, ferrous sulfate, niacin, calcium pantothenate, Vitamin A supplement, menadione sodium bisulfite complex (Vitamin K), manganese sulfate, pyridoxine hydrochloride, copper sulfate, riboflavin supplement, Vitamin B-12 supplement, biotin, folic acid, Vitamin D-3 supplement, potassium iodide. C253821

## Ingredients (Turkey & Giblets Recipe):

Water, turkey, liver, wheat gluten, poultry giblets, fish, corn starch-modified, soy flour, glycine, natural flavor, sodium bisulfate, potassium chloride, salt, fish oil, caramel color, tricalcium phosphate, choline chloride, taurine, Vitamin E supplement, thiamine mononitrate (Vitamin B-1), zinc sulfate, ferrous sulfate, niacin (Vitamin B-3), calcium pantothenate (Vitamin B-5), Vitamin A supplement, menadione sodium bisulfite complex (Vitamin K), manganese sulfate, copper sulfate, pyridoxine hydrochloride (Vitamin B-6), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, biotin (Vitamin B-7), folic acid (Vitamin B-9), Vitamin D-3 supplement, potassium iodide. # Calming Care

## Medical Indications:

Calming Care is recommended as a probiotic supplement to help dogs with the following:

- Anxiety
- Fear
- Stress

## Behavioral Health:

Proprietary use of probiotic strain BL999 to help dogs maintain calm behavior

Helps dogs cope with external stressors like separation, unfamiliar visitors, novel sounds, or changes in routine and location

Helps dogs maintain positive cardiac activity during stressful events, promoting a positive emotional state

- In a blinded crossover design study, 90% of dogs showed an improvement in displaying anxious behaviors such as excessive vocalization, jumping, pacing, and spinning.
- Helps blunt cortisol response to anxious events and supports a healthy immune system
- Contains a probiotic with  $1 \times 10^9$  CFU of *Bifidobacterium longum* BL999 per packet to support balanced behavior

## General Health:

- Excellent palatability

\*Relevation Veterinary Tracker, 2023

# Calming Care

## Medical Indications:

Calming Care is recommended as a probiotic supplement to help cats with the following:

- Anxiety
- Fear
- Stress

## Behavioral Health:

Proprietary use of probiotic strain BL999 to help cats maintain calm behavior

Helps promote positive behaviors such as playing and seeking out social contact

Helps cats cope with changes in routine and location

- Improvement shown in cats displaying anxious behaviors such as pacing
- Helps reduce sneezing associated with FHV-1
- Helps blunt cortisol, a marker of stress, and supports a healthy immune system

## General Health:

- Great taste

# FortiFlora®

## Medical Indications:

FortiFlora is recommended as a probiotic supplement to help with the following:

- Diarrhea associated with microflora imbalance
- Acute enteritis
- Diarrhea associated with stress, antibiotic therapy, and diet change
- Poor fecal quality in puppies
- To promote a strong immune system
- Flatulence
- To enhance palatability

## Medical Contraindications:

- Severely immune compromised dogs

## Gastrointestinal Health:

- Probiotic supplement for the management of puppies and adult dogs with diarrhea
- Contains a probiotic proven to promote normal intestinal microflora
- Proprietary microencapsulation process for enhanced stability
- Contains a guaranteed level of viable microorganisms
- Increases levels of the beneficial bacteria *Bifidobacteria* and *Lactobacilli* in dogs
- When used in combination with metronidazole, diarrhea in dogs is shown to improve faster than with metronidazole alone
- Helps reduce flatulence in dogs

## Immune Health:

- Promotes a strong immune system at both the local and systemic levels
- Promotes increased fecal IgA levels in adult dogs

## General Health:

- Shown to be safe for use in growing and adult dogs
- Easy to administer
- Enhances palatability

\*Relevation Veterinary Tracker, 2023

## SYNBIOTIC ACTION

### Medical Indications:

- Stool quality responsive to fiber
- To increase microbial diversity
- Diarrhea associated with microflora imbalance
- Diarrhea associated with stress and antibiotic therapy
- Poor fecal quality in dogs
- To promote a strong immune system
- To enhance palatability

### Medical Contraindications:

- Severely immune compromised canines

### Gastrointestinal Microbiome Health:

- Synbiotic action of probiotics and prebiotic fiber for the management of dogs with diarrhea and to support a healthy intestinal microbiome
- Contains prebiotic fiber to increase gastrointestinal microbial diversity
- Contains prebiotic fiber (psyllium) to stimulate the growth of specific bacteria, including *Lactobacillus* and *Bifidobacterium* species

### Immune Health:

- Supports a strong immune system
- Contains the same probiotic strain in FortiFlora, which promotes increased fecal IgA levels in adult dogs

### Gastrointestinal Health:

- Contains the same probiotic strain in FortiFlora, proven to promote normal intestinal microflora
- Probiotic supplement for the management of puppies and adult dogs with diarrhea
- Proprietary microencapsulation of probiotic for enhanced stability
- Contains a guaranteed level of live microorganisms
- Contains a probiotic that when used in combination with metronidazole, is shown to improve diarrhea in dogs faster than with metronidazole alone

### General Health:

- Safe for use in growing and adult dogs
- Easy to administer
- Excellent palatability

\*Relevation Veterinary Tracker, 2023

# FortiFlora® PRO

## SYNBIOTIC ACTION

### Medical Indications:

- Stool quality responsive to fiber
- Feline constipation
- To increase microbial diversity
- Diarrhea associated with microflora imbalance
- Diarrhea associated with stress and antibiotic therapy
- Poor fecal quality in cats
- To promote a strong immune system
- To enhance palatability

### Medical Contraindications:

- Severely immune compromised felines

### Gastrointestinal Microbiome Health:

- Synbiotic action of prebiotic fiber and probiotics for the management of cats with diarrhea and to support a healthy intestinal microbiome
- Contains prebiotic fiber to increase gastrointestinal microbial diversity
- Contains prebiotic fiber (psyllium) to stimulate the growth of specific bacteria, including *Lactobacillus* and *Bifidobacterium* species

### Immune Health:

- Supports a strong immune system

### Gastrointestinal Health:

- Contains the same probiotic strain in FortiFlora, proven to promote normal intestinal microflora
- Probiotic supplement for the management of kittens and adult cats with diarrhea
- Proprietary microencapsulation of probiotic for enhanced stability
- Contains a guaranteed level of live microorganisms

### General Health:

- Safe for use in growing and adult cats
- Easy to administer
- Excellent palatability

\*Relevation Veterinary Tracker, 2023

# Hydra Care®

## Medical Indications:

Hydra Care is recommended as a supplement for cats who would benefit from additional water intake.

## Medical Contraindications:

- Food allergies

## General Health:

- Cats consume on average 50% more liquid each day\*
- Shown to decrease urine specific gravity and osmolality\*
- Helps support healthy hydration
- Supports healthy kidneys
- Added nutritional osmolytes support hydration
- Easy to feed

\*Compared to cats consuming only water in addition to dry feeding.  
Cats must consume at least 2 oz per 5 lbs of body weight daily for benefit.

## AVERAGE NUTRIENT CONTENT

# Multi Care

SKIN + IMMUNE + GUT

## Medical Indications:

Dogs that may benefit from additional gastrointestinal, skin, and immune support

## Medical Contraindications:

- Food allergies

## Multiple Benefits:

- Formulated with multi-active blends to proactively support skin, digestive, and immune health
- Contains a blend of prebiotic fiber, a probiotic, and postbiotics to support digestive and immune health

## Immune Health:

- Immune blend with L-Glutamine, a probiotic, postbiotics, Vitamin E & zinc to support a strong immune system:
  - L-Glutamine contributes energy to immune cells
  - Live probiotics help support gut microbiome resilience during naturally occurring stress
  - Postbiotics support a strong immune system and promote normal antibody production
  - Antioxidants support a strong immune system and help fight free radicals

## Dermatologic Health:

- Derm blend with omega-3 fatty acids, Vitamin E, zinc, and biotin supports skin health & dogs with sensitive skin

## Gastrointestinal Health:

- Gut blend with prebiotic fiber and a probiotic to support digestive and microbiome health

# OraChews™

## Clinical Considerations:

Dental health is one of the top issues addressed at dog wellness visits with veterinarians. Veterinarians prioritize dental health because it's an important—yet often overlooked—aspect of a pet's overall well-being. Pro Plan® Veterinary Diets OraChews™ Dental Care Canine Treats are innovative chews that not only carry the trusted VOHC seal for helping control tartar, but also help clean teeth and freshen breath, supporting dental health between professional cleanings.

## Medical Indications:

OraChews are recommended for the following:

- Dogs on DH Dental Health®
- Normal healthy dogs on a maintenance diet
- Dogs that are prone to tartar accumulation

## Treat Characteristics:

OraChews have been formulated with the following characteristics:

- Works effectively to help control tartar buildup in dogs
- Veterinary Oral Health Council Seal of Acceptance: Helps control tartar
- Chewy texture helps clean teeth and freshen breath
- Vitamin A, vitamin E, and zinc to support a healthy immune system
- Enticing chicken flavor provides great taste
- Low calorie
- Low fat

Feed as a treat to your adult dog. This product is a treat and is not intended to be fed as a meal. The caloric intake from treats should not exceed 10% of a dog's total daily caloric requirement. If treats are given, the amount of food should be reduced accordingly. Monitor your dog to ensure treat is adequately chewed prior to swallowing. This chew snack is not suitable for puppies under one year of age or adult dogs under 15 pounds. Feed on an easy-to-clean surface. Provide adequate fresh water in a clean container daily. For your pet's health, see your veterinarian regularly.

## Ingredients:

Rice, glycerin, wheat flour, sodium tripolyphosphate, malted barley flour, chicken by-product meal, mono and dicalcium phosphate, calcium carbonate, sorbic acid (a preservative), calcium propionate (a preservative), sodium bicarbonate, zinc sulfate, Vitamin E supplement, ferrous sulfate, manganese sulfate, tetra sodium pyrophosphate, copper sulfate, preserved with mixed tocopherols, natural flavor, niacin (Vitamin B-3), calcium iodate, thiamine mononitrate (Vitamin B-1), calcium pantothenate (Vitamin B-5), Vitamin A supplement, riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid (Vitamin B-9), sodium selenite, menadione sodium bisulfite complex (Vitamin K), biotin (Vitamin B-7), Vitamin D-3 supplement. A556725/A556825

# Dental Chewz™

## Clinical Considerations:

An effective dental chew for dogs, these treats are long-lasting, delicious and high in protein. Dental Chewz have been recognized by the Veterinary Oral Health Council as a product that works effectively to significantly reduce tartar buildup in dogs fed two treats per day, and are backed by extensive testing. These treats are a perfect complement to DH Dental Health® Canine Formulas and a great treat for healthy dogs.

## Medical Indications:

Dental Chewz are recommended for the following:

- Dogs on DH Dental Health
- Normal healthy dogs on a maintenance diet
- Dogs that are prone to tartar accumulation

## Treat Characteristics:

Dental Chewz have been formulated with the following characteristics:

- Long-lasting chew cleans teeth and freshens breath
- VOHC Seal of Acceptance: Helps control tartar
- High protein
- Long-lasting
- Great taste

## Feeding and Administration:

Give your adult dog at least two Pro Plan Veterinary Diets Dental Chewz daily to help reduce tartar buildup and help keep his teeth clean.

# Gentle Snackers®

HYDROLYZED + LOW FAT

## Clinical Considerations:

Pet owners love to give their pets treats, but treats are often restricted for dogs on special diets. Purina® Pro Plan® Veterinary Diets Gentle Snackers® Hydrolyzed + Low Fat canine treats offer a hydrolyzed option, as well as a low-fat treat for dogs on a weight loss/maintenance program. Based on Purina® Pro Plan® Veterinary Diets HA Hydrolyzed® Canine Formula, these crunchy treats can be given to dogs with adverse food reactions.

## Medical Indications:

Gentle Snackers is recommended for the following:

- Dogs with adverse food reactions
- Dogs with sensitive gastrointestinal tracts
- Dogs on a weight loss program
- Healthy dogs on a maintenance diet

## Medical Contraindications:

- None

## Treat Characteristics:

Gentle Snackers has been formulated with the following characteristics:

- Low molecular weight
- Low fat
- Single hydrolyzed protein source
- Great taste

## Feeding and Administration:

Feed 3 treats per 5 pounds of body weight, not to exceed 20 treats per day. The calorie intake from treats should not exceed 10% of a dog's total daily caloric requirement. If treats are given, the amount of food should be reduced accordingly.

# Dental Bites

## Clinical Considerations:

Every client enjoys giving their pet a treat—especially if that treat can also help clean their cat's teeth and comply with their weight loss or maintenance diet. At less than 2 kcals per treat, Purina® Pro Plan® Veterinary Diets Dental Bites feline treats work effectively to help control buildup of tartar and can be used as part of a weight loss or maintenance program, or as a calorie-smart treat with any diet. These crunchy bites also help to clean teeth and freshen breath.

## Medical Indications:

Dental Bites are recommended for the following:

- Cats on a weight loss program
- Healthy cats on a maintenance diet

## Treat Characteristics:

Dental Bites have been formulated with the following characteristics:

- Works effectively to help control buildup of tartar
- Less than 2 kcals per treat
- Crunchy texture helps clean teeth, freshen breath, and control tartar
- VOHC Seal of Acceptance: Helps control tartar
- Natural Chicken & Liver Flavors

[www.VOHC.org](http://www.VOHC.org)

## Feeding and Administration:

Feed as a treat to your adult cat. This product is a treat and is not intended to be fed as a meal. For optimal dental benefit, feed 17 treats daily to adult cats weighing 5 pounds or more. Do not feed to cats that weigh less than 5 pounds. The caloric intake from treats should not exceed 10% of a cat's total daily requirement. If treats are given, the amount of food should be reduced accordingly. Provide adequate fresh water in a clean container daily. For your pet's health, see your veterinarian regularly.

Ground yellow corn, chicken meal, corn protein meal, animal digest, beef fat preserved with mixed-tocopherols, powdered cellulose, fish meal, natural liver flavor, glycerin, calcium carbonate, natural flavor, dried yeast, Vitamin E supplement, tricalcium phosphate. B250123

# Urinary Health Treats

## Clinical Considerations:

Clients who own cats with urinary issues are often looking for a variety of ways to help their pets. Purina® Pro Plan® Veterinary Diets Urinary Health Treats feline treats support urinary health. And when fed in conjunction with Purina® Pro Plan® Veterinary Diets UR Urinary® St/Ox®, these treats help reduce the risk of both struvite and calcium oxalate stone recurrence.

## Medical Indications:

Urinary Health Treats is recommended for the following:

- Cats with a history of feline lower urinary tract disease
- Cats eating a urinary diet

## Treat Characteristics:

When fed in conjunction with Purina Pro Plan Veterinary Diets UR Urinary St/Ox, these treats help reduce the risk of both struvite and calcium oxalate stone recurrence.

- Supports urinary health
- When fed in conjunction with Purina Pro Plan Veterinary Diets UR Urinary St/Ox, these treats help reduce the risk of both struvite and calcium oxalate stone recurrence
- High-quality protein
- Contains antioxidants

## Feeding and Administration:

Feed as a treat to your adult cat in combination with Purina Pro Plan Veterinary Diets UR Urinary St/Ox feline cat food formulas. This product is a treat and is not intended to be fed as a meal. Feed up to 2 treats for each 1 pound of body weight, not to exceed 20 treats per day. The caloric intake from treats should not exceed 10% of a cat's total caloric requirement. If treats are given, the amount of food should be reduced accordingly. Provide adequate fresh water in a clean container daily. For your pet's health see your veterinarian regularly.

Your Pet, Our Passion.®

# Food Transitioning Made Simple

When pets suddenly switch from one diet to another, it can cause gastrointestinal upset and other issues. That's why it is important to slowly introduce your pet to a new diet over the course of 7 days. Gradually replace the old food with new food, increasing the amount every 1-2 days.

RECOMMENDED DIET: \_\_\_\_\_

Please follow your veterinarian's instructions for total feeding amounts. Contact your veterinarian if you have questions or concerns.

Purina Pro Plan Vet Direct makes home delivery for clients hassle-free, with an easy-to-use website, free shipping, customer incentives, and more. Learn more and enroll today at [ProPlanVetDirect.com](http://ProPlanVetDirect.com).

## Fecal Scoring Chart

SCORE	SPECIMEN EXAMPLE	CHARACTERISTICS
1		<ul style="list-style-type: none"> <li>· Very hard and dry</li> <li>· Often expelled as individual pellets</li> <li>· Requires much effort to expel from body</li> <li>· Leaves no residue on ground when picked up</li> </ul>
2		<ul style="list-style-type: none"> <li>· Firm, but not hard, pliable</li> <li>· Segmented in appearance</li> <li>· Little or no residue on ground when picked up</li> </ul>
3		<ul style="list-style-type: none"> <li>· Log shaped, moist surface</li> <li>· Little or no visible segmentation</li> <li>· Leaves residue on ground, but holds form when picked up</li> </ul>
4		<ul style="list-style-type: none"> <li>· Very moist and soggy</li> <li>· Log shaped</li> <li>· Leaves residue on ground and loses form when picked up</li> </ul>
5		<ul style="list-style-type: none"> <li>· Very moist but has a distinct shape</li> <li>· Present in piles rather than logs</li> <li>· Leaves residue on ground and loses form when picked up</li> </ul>
6		<ul style="list-style-type: none"> <li>· Has texture, but no defined shape</li> <li>· Present as piles or spots</li> <li>· Leaves residue on ground when picked up</li> </ul>
7		<ul style="list-style-type: none"> <li>· Watery</li> <li>· No texture</li> <li>· Present in flat puddles</li> </ul>

# Nutritional Management of GI Health

CHARACTERISTICS	SMALL BOWEL CLINICAL SIGNS*	LARGE BOWEL CLINICAL SIGNS*
Defecation frequency	Normal to slightly increased	Markedly increased
Fecal volume	Normal to increased	Markedly decreased
Fecal quality	Very watery to semi-formed (typical score 6, 7)	Semi-formed, gelatinous (typical score 4, 5)
Frequent urges to defecate	Normal to slightly increased	Markedly increased
Tenesmus (Straining)	Absent	Present
Blood in feces	Dark, old blood, tarry	Bright red, fresh-looking
Mucus in feces	Rarely	Frequently
Fatty stool	Sometimes	No

## RECOMMENDED FORMULAS

### Canine – Small Bowel

### Feline – Small Bowel

### Canine – Large Bowel

### Feline – Large Bowel

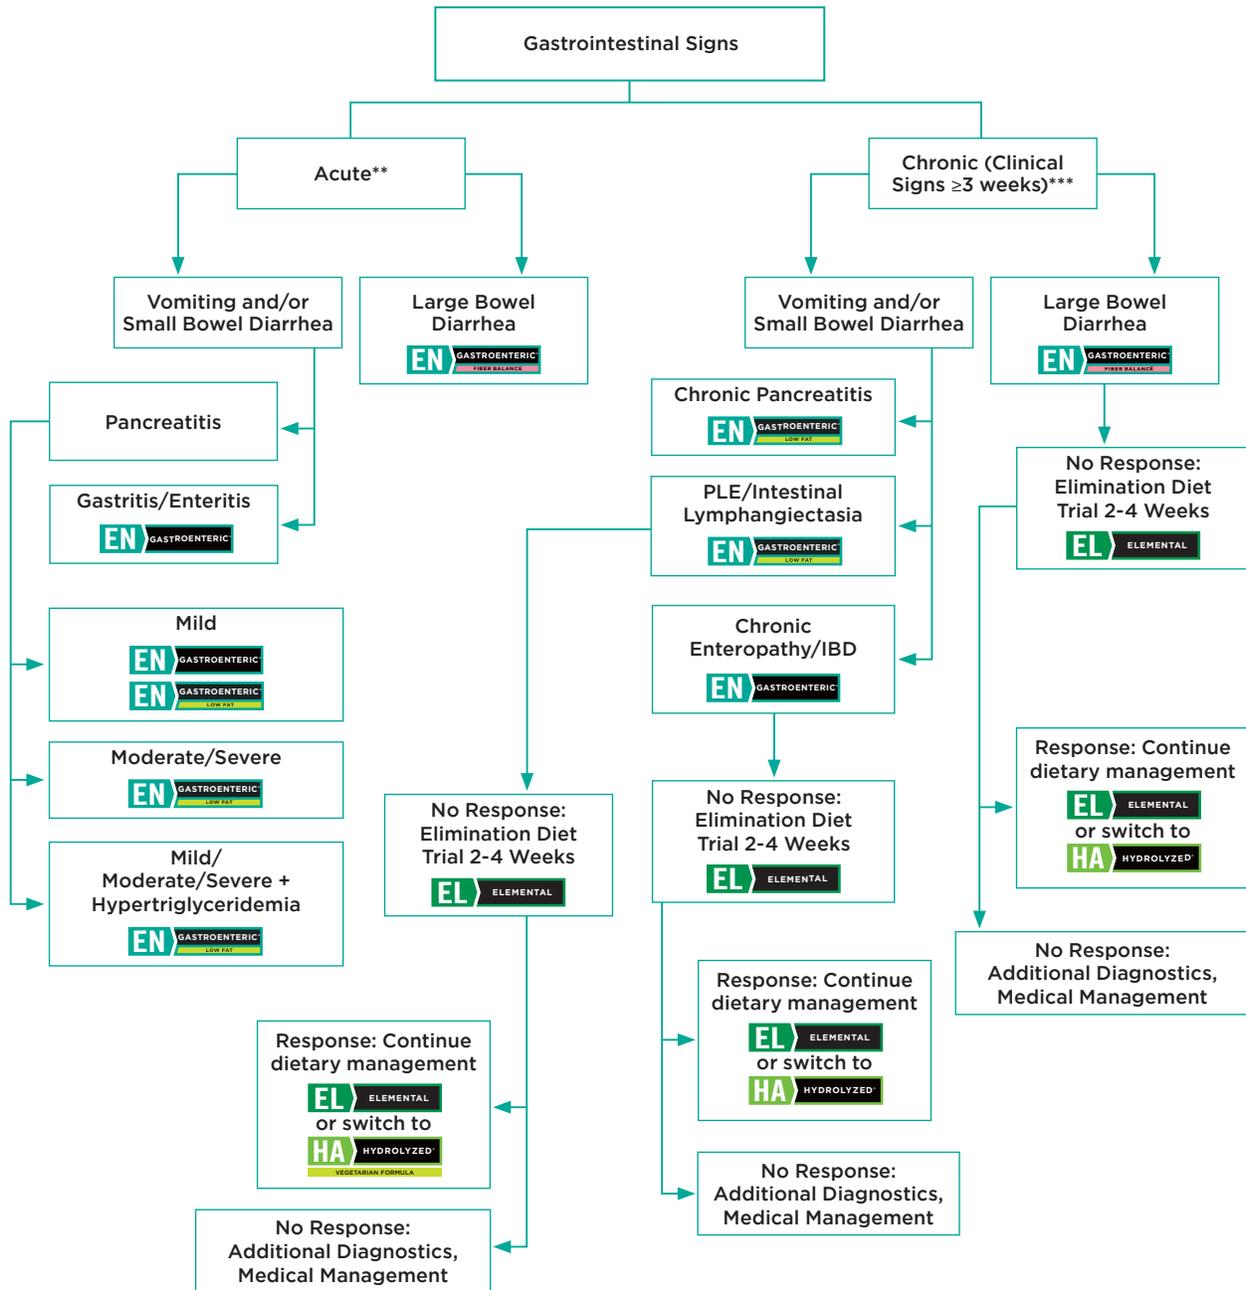

\*In some cases both small bowel and large bowel are affected and clinical signs will vary.

# EVALUATING PATIENTS WITH GI CONDITIONS\*

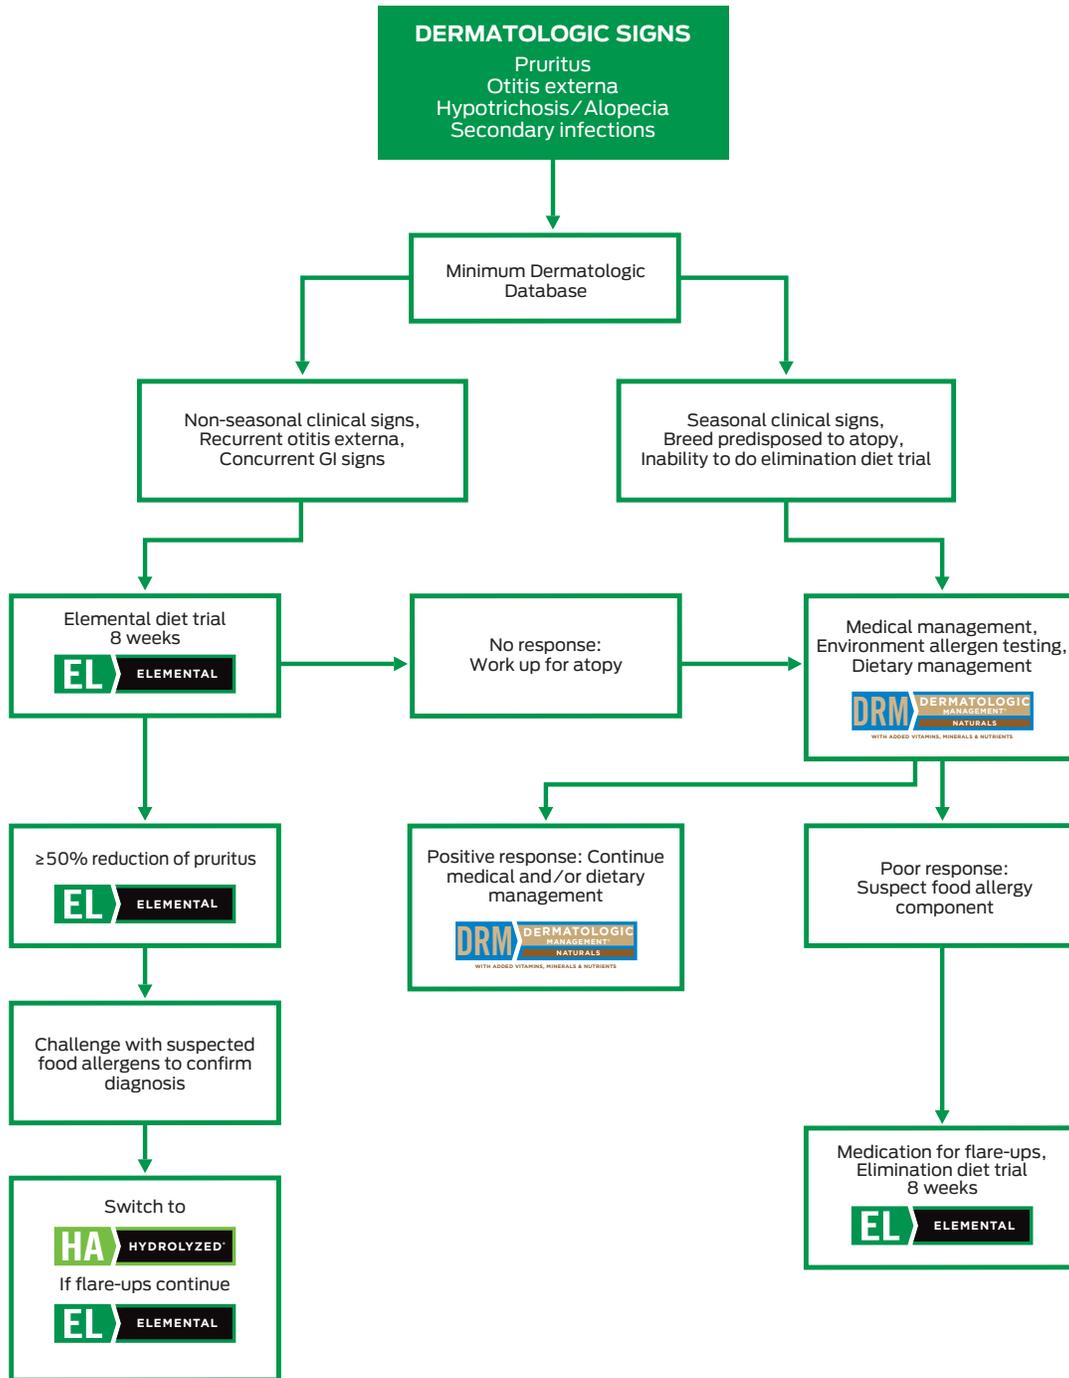

\*Listed formulas are initial diet recommendations. Diet Selection may vary depending on patient's clinical signs and comorbidities. Further dietary modifications may be required based on clinical response and chronicity.

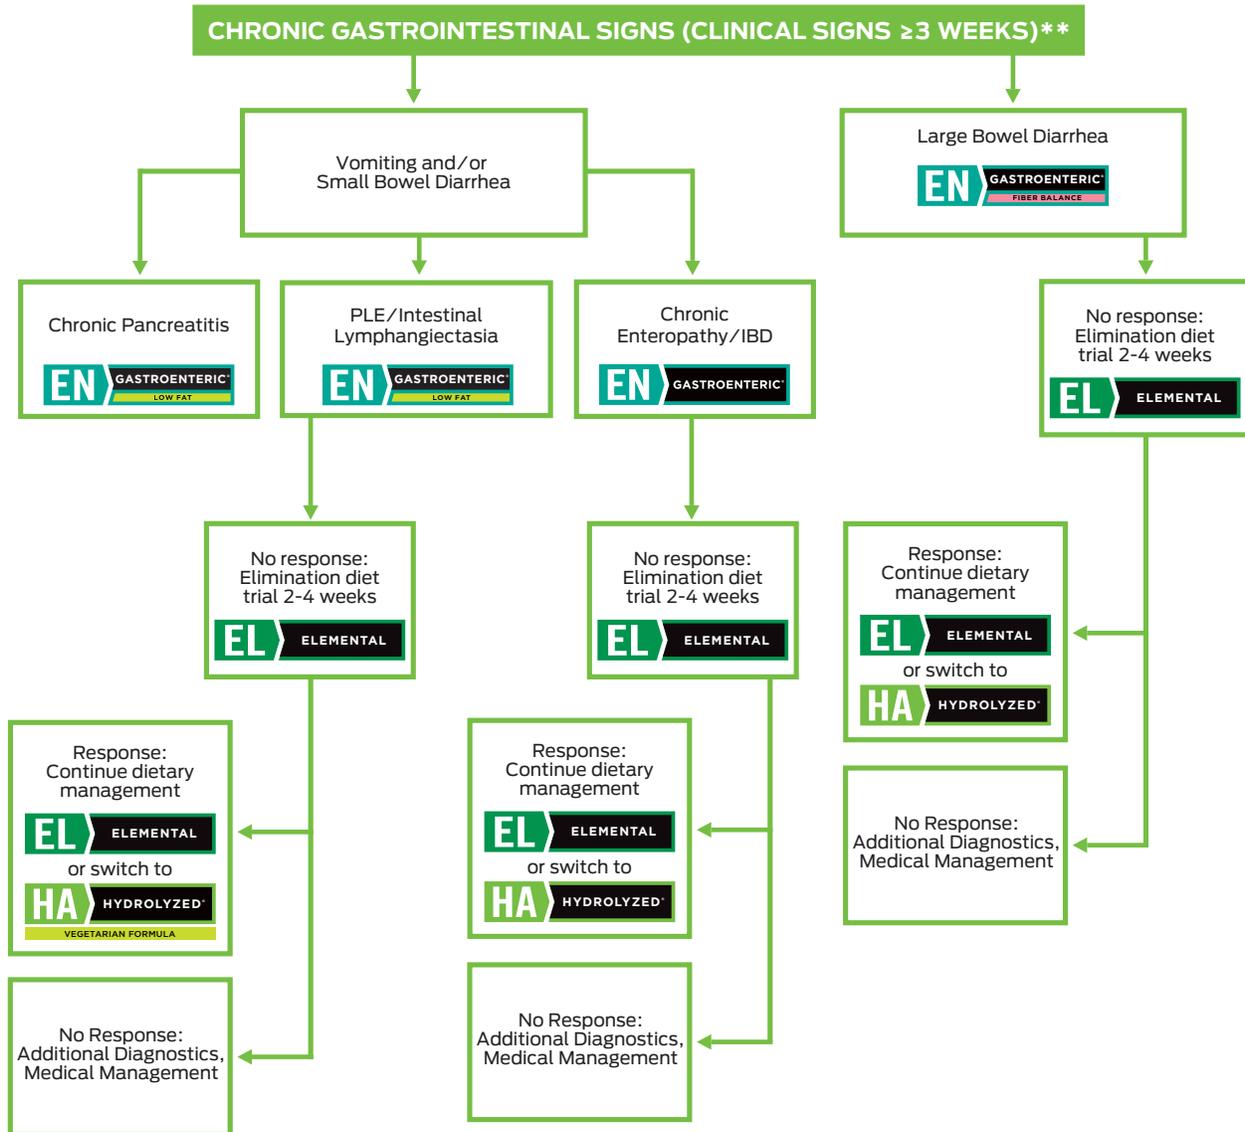

\*\*Diagnostics for acute gastrointestinal signs can include Fecal O&P and antigen testing, Fecal PCR Panel, CBC, Serum Chemistry, Urinalysis, SNAP cPL or Spec cPL, Imaging (Abdominal Ultrasound, X-Rays).

\*\*\*Additional Diagnostics for chronic gastrointestinal signs include B-12/Folate, TLI, Resting Cortisol or ACTH Stimulation Test, GI Biopsies.

# Canine Body Condition System

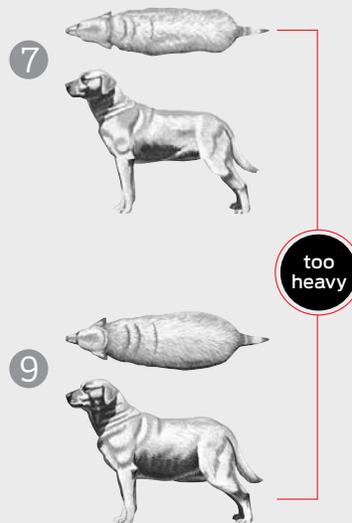

1. Ribs, lumbar vertebrae, pelvic bones and all bony prominences evident from a distance. No discernible body fat. Obvious loss of muscle mass.
2. Ribs, lumbar vertebrae, pelvic bones easily visible. No palpable fat. Some evidence of other bony prominence. Minimal loss of muscle mass.
3. Ribs easily palpated and may be visible with no palpable fat. Tops of lumbar vertebrae visible. Pelvic bones becoming prominent. Obvious waist and abdominal tuck.

4. Ribs easily palpable, with minimal fat covering. Waist easily noted, viewed from above. Abdominal tuck evident.
5. Ribs palpable, without excess fat covering. Waist observed behind ribs when viewed from above. Abdomen tucked up when viewed from side.

6. Ribs palpable with slight excess fat covering. Waist is discernible viewed from above but is not prominent. Abdominal tuck apparent.
7. Ribs palpable with difficulty. Heavy fat cover. Noticeable fat deposits over lumbar area and base of tail. Waist absent or barely visible. Abdominal tuck may be present.
8. Ribs not palpable under very heavy fat cover, or palpable only with significant pressure. Heavy fat deposits over lumbar area and base of tail. Waist absent. No abdominal tuck. Obvious abdominal distention may be present.
9. Massive fat deposits over thorax, spine and base of tail. Waist and abdominal tuck absent. Fat deposits on neck and limbs. Obvious abdominal distention.

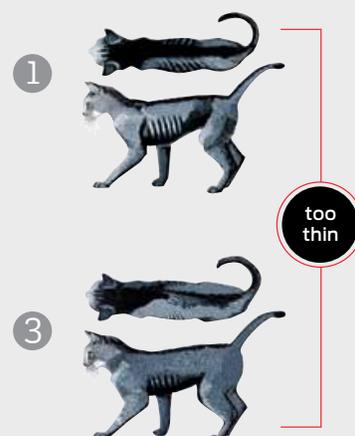

Questions? Contact your Purina Veterinary Sales Consultant (PVC) or the Purina Veterinary Resource Center at 1-800-222-VETS (8387) 8:00 AM–6:00 PM WEEKDAYS, CST.

# Feline Body Condition System

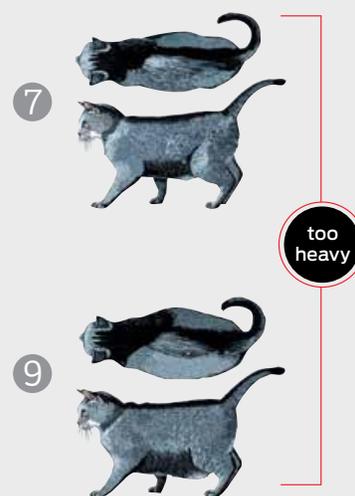

1. Ribs visible on short-haired cats. No palpable fat. Severe abdominal tuck. Lumbar vertebrae and wings of ilia easily palpated.
2. Ribs easily visible on short-haired cats. Lumbar vertebrae obvious with minimal muscle mass. Pronounced abdominal tuck. No palpable fat.
3. Ribs easily palpable with minimal fat covering. Lumbar vertebrae obvious. Obvious waist behind ribs. Minimal abdominal fat.
4. Ribs palpable with minimal fat covering. Noticeable waist behind ribs. Slight abdominal tuck. Abdominal fat pad absent.

5. Well-proportioned. Observe waist behind ribs. Ribs palpable with slight fat covering. Abdominal fat pad minimal.

6. Ribs palpable with slight excess fat covering. Waist and abdominal fat pad distinguishable but not obvious. Abdominal tuck absent.
7. Ribs not easily palpated with moderate fat covering. Waist poorly discernible. Obvious rounding of abdomen. Moderate abdominal fat pad.
8. Ribs not palpable with excess fat covering. Waist absent. Obvious rounding of abdomen with prominent abdominal fat pad. Fat deposits present over lumbar area.
9. Ribs not palpable under heavy fat cover. Heavy fat deposits over lumbar area, face and limbs. Distention of abdomen with no waist. Extensive abdominal fat deposits.

The BODY CONDITION SYSTEM was developed at the Nestlé Purina PetCare Center and has been validated as documented in the following publications:  
 D. Mawby, J. W. Bartges, T. Mayers, et al. "Comparison of body fat estimates by dual-energy X-ray absorptiometry and deuterium oxide dilution in client owned dogs," *Compendium* 23(9A) (2001): 70; D. P. Laflamme, "Development and Validation of a Body Condition Score System of Dogs," *Canine Practice* July/August 22 (1997): 10-15  
 Kealy, et al. "Effects of Diet Restriction on Life Span and Age-Related Changes in Dogs," *JAVMA* 220 (2002): 1315-1320

## EXPLORING THE GUT MICROBIOME AND ITS ROLE IN YOUR PATIENTS' HEALTH

The gastrointestinal tract is primarily known as the system responsible for digestion and nutrient absorption. But it also plays a remarkable role in overall health—both for humans and pets.

### The gut is home to:

70%

of the immune system, protecting the body from harmful (pathogens) or foreign substances (antigens).<sup>1</sup>

A complex microbial ecosystem with trillions of microorganisms and their genetic material known as the gut microbiome.

### How is the Microbiome Linked to Health?

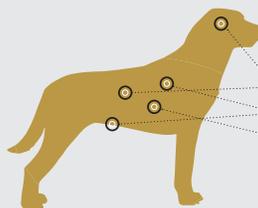

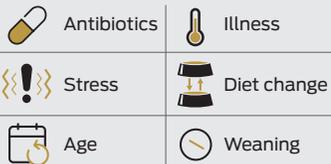

The microbiome can impact a pet's overall health in many ways:<sup>2</sup>

### Why is Microbiome Balance So Important?

Because the microbiota in the gut help support overall health, it is important to maintain a balance between beneficial and potentially pathogenic bacteria. An imbalanced or maladapted microbiota is called dysbiosis.

What can lead to dysbiosis?

Dysbiosis is associated with a variety of health conditions:<sup>2</sup>

- Chronic Inflammatory Enteropathy
- Obesity
- Cardiovascular disease
- Immune-mediated conditions
- Neurodevelopmental conditions

### How Can You Help? Promote Microbiome Balance with Nutrition.

#### PROBIOTICS

Live microorganisms that, when consumed in adequate amounts, confer a health benefit on the host.<sup>3</sup>

Probiotics are strain-specific and dose-dependent, meaning that different strains have different effects and they must be given in specific amounts.

#### PREBIOTICS

Some soluble fibers are prebiotics – substances that are selectively utilized by the host microorganisms resulting in a health benefit.<sup>4</sup> This can result in increased microbial diversity and the production of short-chain fatty acids that nourish colonocytes.

Probiotics that contain both prebiotics and probiotics are called synbiotics.

#### COLOSTRUM

Contains bioactives and antibodies that initiate a beneficial immune response and help to stabilize intestinal microflora.<sup>5</sup>

Studies show that when fed diets supplemented with bovine colostrum bio-actives, both kittens<sup>6</sup> and adult dogs<sup>5</sup> have stronger responses to vaccinations.

## WHAT IS DISHAA?

DISHAA is a tool to help veterinarians and owners assess the mental acuity of a dog, and for veterinarians to potentially diagnose Cognitive Dysfunction Syndrome (CDS).

The prevalence of CDS increases with age\*:

- 8–10 years: 3.4%
- 10–12 years: 5%
- 12–14 years: 23.3%
- >14 years: 41%

Cognitive Dysfunction Syndrome may be diagnosed using the DISHAA questionnaire. In order for a dog to be diagnosed with CDS, owners must observe their dog exhibiting signs across several DISHAA categories.

<b>D</b>	<b>DISORIENTATION</b>	<ul style="list-style-type: none"> <li>• Gets stuck, difficulty getting around objects, goes to hinge side of door</li> <li>• Stares blankly at walls, floor, or into space</li> <li>• Does not recognize familiar people/familiar pets</li> <li>• Gets lost in home or yard</li> <li>• Less reactive to visual (sights) or auditory (sounds) stimuli</li> </ul>
<b>I</b>	<b>SOCIAL INTERACTIONS</b>	<ul style="list-style-type: none"> <li>• More irritable/fearful/aggressive with visitors, family or other animals</li> <li>• Decreased interest in approaching, greeting or affection/petting</li> </ul>
<b>S</b>	<b>SLEEP/WAKE CYCLES</b>	<ul style="list-style-type: none"> <li>• Pacing/restless/sleeps less/waking at night</li> <li>• Vocalization at night</li> </ul>
<b>H</b>	<b>HOUSESOILING, LEARNING AND MEMORY</b>	<ul style="list-style-type: none"> <li>• Less able to learn new tasks or respond to previously learned commands/name/work</li> <li>• Indoor soiling of urine or stool/decreased signaling to go out</li> <li>• Difficulty getting dog's attention/increased distraction/decreased focus</li> </ul>
<b>A</b>	<b>ACTIVITY</b>	<ul style="list-style-type: none"> <li>• Decrease in exploration or play with toys, family members, other pets</li> <li>• Increased activity including aimless pacing or wandering</li> <li>• Repetitive behaviors, e.g., circling, chewing, licking, star gazing</li> </ul>
<b>A</b>	<b>ANXIETY</b>	<ul style="list-style-type: none"> <li>• Increased anxiety when separated from owners</li> <li>• More reactive/fearful to visual (sights) or auditory (sounds) stimuli</li> <li>• Increased fear of places/locations (e.g., new environments/going outdoors)</li> </ul>

\*Salvin, H. E., McGreevy, P. D., Sachdev, P. S., & Valenzuela, M. J. (2010). Under diagnosis of canine cognitive dysfunction: a cross-sectional survey of older companion dogs. *Veterinary Journal* (London, England : 1997), 184(3), 277–81. doi:10.1016/j.tvjl.2009.11.007.

# INTERNATIONAL RENAL INTEREST SOCIETY RECOMMENDATIONS

IRIS was created to help practitioners better diagnose, understand, and treat renal disease in cats and dogs. They have created an internationally recognized set of guidelines for classifying and treating kidney disease. The staging system is not used to make a diagnosis of chronic kidney disease but is used to facilitate appropriate treatment, monitoring, and further diagnostics.

The IRIS staging system is based primarily on serum creatinine concentrations of well-hydrated dogs and cats. For further staging and recommendations, please visit: <https://www.iris-kidney.com/>.

STAGE	BLOOD CREATININE* μmol/l mg/dl SDMA# μg/dl		COMMENTS
	DOGS	CATS	
1	<125 <1.4 <18	<140 <1.6 <18	Normal blood creatinine or normal or mild increase blood SDMA. Some other renal abnormality present (such as, inadequate urinary concentrating ability without identifiable non-renal cause (in cats not dogs), abnormal renal palpation or renal imaging findings, proteinuria of renal origin, abnormal renal biopsy results, increasing blood creatinine or SDMA concentrations in samples collected serially). Persistently elevated blood SDMA concentration (>14 μg/dl) may be used to diagnose early CKD.
2	125-250 1.4-2.8 18-35	140-250 1.6-2.8 18-25	Normal or mildly increased creatinine, mild renal azotemia (lower end of the range lies within reference ranges for creatinine for many laboratories, but the insensitivity of creatinine concentration as a screening test means that patients with creatinine values close to the upper reference limit often have excretory failure). Mildly increased SDMA. Clinical signs usually mild or absent.
3	251-440 2.9-5.0 36-54	251-440 2.9-5.0 26-38	Moderate renal azotemia. Many extrarenal signs may be present, but their extent and severity may vary. If signs are absent, the case could be considered as early Stage 3, while presence of many or marked systemic signs might justify classification as late Stage 3.
4	>440 >5.0 >54	>440 >5.0 >38	Increasing risk of systemic clinical signs and uremic crises.

\*The blood creatinine concentrations apply to average size dogs – those of extreme size may vary.

#The recommendations for SDMA are based on published literature which utilizes proprietary IDEXX technology for measuring SDMA. At this time, it is not known if other assays will provide equivalent results.
